150F

TECHNICAL SPECIFICATIONS

150F SIDE VIEW DIAGRAM

- **Working Height** 55'/16.7 m
- **Working Side Reach** 39'/11.5 m
- **Platform Capacity** 600 lbs/272 kg
- **Platform Size** 40x60 in/102x152 cm
- **Platform Type** Insulated Top-Mount
- **Lifting Capacity (Main Winch)** 3,650 lbs/1,656 kg
- **Insulation Rating** 46kV Category C

- **Powered Boom Sections** 3
- **Overall Height** 11'6"/3.4 m
- **Unit Weight (Bare)** 11,500 lbs/5,216 kg
- **Outrigger Spread Main** 12'/3.6 m
- **Outrigger Spread Auxiliary** 8'/2.4 m
- **Front Gross Axle Weight Rating** 10,000 lbs/4,536 kg
- **Rear Gross Axle Weight Rating** 19,000 lbs/8,618 kg

**HIREACH - 150F****TECHNICAL SPECIFICATIONS****TECHNICAL SPECIFICATIONS**

Maximum Platform Height: 50' ground to platform floor.

Working Range: 55' max. height and 39' max. side reach.

Work Platform: 40x60" Insulated Top-Mount work platform with 40" high fiberglass rails and a grated fiberglass floor. Equipped with two safety lanyard attachment loops and two safety harnesses and 72" lanyards. Platform capacity 600 lbs.

Platform Leveling System: Hydraulic "closed" system consisting of twin platform cylinders interacting with a boom-actuated master cylinder mounted in boom support turret. System provided with factory-set relief valves to compensate for oil expansion or overload during platform leveling operation. Remote releveling controls provided in platform and at ground controls to give precise releveling capability.

Platform Controls: Control signals to be transmitted into work platform via plastic fiberoptic "light conduction" from turret control station. Fiberoptic system powered by battery with a backup located in truck cab with 12-volt charger. Single joystick control with finger enable switch in platform to provide boom extension, elevation and rotation controls. Control cable shall extend through the column to the cable carrier and through a fiberglass tube in boom sections. Lower boom controls shall include all general control options including engine speed, start/stop, and upper controls with override.

Lower Controls: Mounted on curbside of turret.

Outrigger Controls: Parallel open-center stack valve for lever-operated control of right and left outriggers. The outrigger valves are mounted at the rear, under each corner of the bed with roadside valve controlling roadside outriggers and curbside valve

controlling curbside outriggers.

Outriggers: "A" type out-and-down main outriggers with 12' spread. "A" type underslung secondary outriggers with 8' spread.

Frame: One piece, all welded, box-type fabrication with integral outrigger mounts.

Turret: Reverse offset turret is one-piece weldment mounted on turret box. Turret rotates on large diameter ball bearing.

Rotation: Continuous turret rotation with no stops. Hydraulic motor drives turret through self-locking gear box.

Boom: Steel rectangular tube sections and one fiberglass section 9" high x 7" wide with a 3/4" wall section. Assembly includes heavy-duty cylinder fittings, pivot pins, and replaceable wear pads.

Boom Extension: Two opposing "piggyback" extension cylinders extend the boom sections.

Lift: One single-acting full displacement, long stroke cylinder, provides smooth and stable boom elevation. Holding valve prevent boom from falling in event of hose failure.

Cylinders: All cylinders use microhoned cylinder tubing, chrome shafts, top grade packing and protective rod wipers. Cylinder-mounted holding valves provided on all load-holding cylinders.

Hoses: All high pressure hoses are wire braid reinforced with a minimum safety factor of 4 to 1.

Oil Tank Capacity: 35 gallon mounted to truck frame on roadside.

Hydraulic System: Operating pressure approximately 2,500 PSI. System is parallel open center type and is equipped with liquid-filled pressure gauge. Oil is supplied to upper cylinders through hydraulic union in center of turret to cable carrier along side of the boom.

Pump: Gear type, direct mount to truck PTO.

PTO: Heavy-duty, high-speed. Cable engaged from cab.

Cab Equipment: PTO cable with indicator lights installed in truck cab. Engine speed control and start/stop installed with control switches in platform remote control box and also located at lower controls. U/L approved 5:BC dry chemical fire extinguisher installed in truck cab.

Operators Manual & Video: Two CDs and one printed copy of operation, maintenance, safety and parts manual provided with each unit. Operational and safety video provided at delivery.

Installation: Unit installed on truck, painted, system and tank filled with oil, tested, inspected, and ready to operate.

Standard Paint: Paint boom and turret red, outriggers red, and bed and boxes black. Top of bed painted with black nonskid surface.

Bumper: Bureau of Motor Carrier Safety rear bumper.

Weight: Approximately 11,500 lbs. with 18' steel-floor bed less truck.

Truck Chassis Required: Approx. 120" C.A., RBM 900,000 in-lb. per rail, 10,000 lb. front axle and 25,999 lb. GVWR required. Trucks must have increased cooling, heavy-duty front and rear springs, 12V electrical system with high capacity alternator, cab clearance stop/tail/backup lights, and I.D. lamps. Recommended GVWR is minimum for HiReach with flatbed only. Contact factory when additional equipment is to be added.

Options:

3,650 or 2,000 lb Capacity Boom Winch
500 lb Capacity Platform Jib Attachment
Much More...

Elliott Equipment Company reserves the right to change the specification of any unit at any time without prior notice. This brochure is only a statement of general specifications on the date of this publication. For more detailed info on specific Elliott trucks go to www.elliottequip.com

**HIREACH - I50F****TECHNICAL SPECIFICATIONS****CHASSIS DATA**

	I50F
Wheelbase (WB)	187" / 475 cm
Cab to Axle (CA)	120" / 305 cm
Cab to End of Frame (EOF)	220" / 559 cm
Frame Section Modulus	9.0 in3 / 110,000 psi
Front Axle Gross Weight Rating	10,000 lb / 4,536 kg
Rear Axle Gross Weight Rating	19,000 lb / 8,618 kg
Extended Front Frame	Not Required

Chassis data is minimum general requirements-not for engineering.
Actual dimensions and truck data will depend on truck selection and axle configuration.

OPTIONS**Radio Remote Control**

Interference protected radio remotes hard-wired to the platform let you get closer to your work and have full control over your machine.

**Material Handling Jib**

Equip your HiReach platform with a material handling jib crane to handle up to 500 pounds from within arm's reach..

**MH Outriggers With Shortjacking**

Reduce outrigger spread with MH outriggers behind the cab and Elliott's Automatic Safety Rotation Lockout to operate your HiReach in confined spaces.

**Outrigger Pad Holders**

Outrigger pad holders safely store your pads for travel and leave plenty of room for tool boxes.

**Bed Accessories**

Mount a wide variety of tool accessories including welders, power washers, and generators on the bed with lines to the platform.

**Platform Accessories**

Choose from a list of platform accessories including 110V outlets, welding leads, hydraulic tools, and much more.

**Outrigger Extensions**

Our pin-on outrigger extensions give you extra clearance for work on hills and around guardrails.

**Line Body**

Let us work with you to customize a line body to secure your tools and supplies the the best way for your application.
