Telescopic Handlers

(Equipped with Interim TIER IV Engine)

RS6-42; Beginning with SN 14551

RS8-42/44; Beginning with SN 17151

RS10-44/55; Beginning with SN 90191

RS12-42; Beginning with SN 18151

Parts Manual

Introduction

IMPORTANT: This parts manual contains parts information for all models of the Gehl RS Series Telescopic Handlers, except for the RS5-19 and the RS6-34 models; please refer to the appropriate parts manuals for RS5-19 and RS6-34 parts listings.

NOTE: This parts manual identifies both standard and optional features for these models. Depending on the features of your machine, some of the items identified in the parts lists may, or may not be included with the machine.

Furthermore, be aware that many components (such as transmissions and axles) differ between the various models; be sure to review the parts listing for the correct model before ordering parts.

RS6 and RS8 Models Only

RS10 and RS12 Models Only

Page markers (tabs)—as shown to the left—are used in the transmission and axle sections to help identify components specific to each model. Be sure to check the page marker, as well as the page header, to verify the model before ordering parts

When ordering service parts, specify the part number, full description, quantity required, and the unit model and serial number.

RS Series

Model and serial numbers for this unit are stamped on a plate located inside the operator's station. The serial number is also stamped on the top front of the frame. The above reference shows the breakdown of the serial number:

"Right" and "left" are determined from a position standing behind the unit and facing the direction of forward travel.

Gehl Company reserves the right to make changes or improvements in the design or construction of any part of the unit without incurring the obligation to install such changes on any unit previously delivered.

The following icons appear on various pages throughout the manual; they are used to inform, as well as direct you to more information.

Tilt Cylinder parts are on page 247.

Identifies where additional pages for component parts, seals, and kits can be found.

Interior Cab Options are on page 18.

Identifies where additional information can be found.

Refer to page 126 for the warning decal.

Alerts and directs user to investigate more information.

NOTE: Hydraulic bulkhead fitting.

Identifies missing, hidden parts, or adds informational comments.

- a Contact John Deere parts department to order this component part.
- b Used with #2 size DPF; order this item if item #31 exhaust pipe has expansion slots (shown below).
- c Used with #3 size DPF; order this item if item #31 exhaust pipe does not have expansion slots (refer to illustration below).
- d Early-style mounting band is no longer available; order item #4, which is a direct replacement. Item #4 also includes a metric nut item #2.
- e Included with item #4; be aware this is a metric nut.
- f This is an SAE nut, do not use this with item #4.
- x Only RS6-42 and RS8-42/44
- y Only RS10-44/55 and RS12-42

NOTE: Early machines were equipped with a size #3 DPF; later machines are equipped with a size #2 DPF. Inspect the exhaust pipe where it attaches to the DPF. If the exhaust pipe has expansion slots similar to those shown in the illustration to the left, then the machine is equipped with a size #2 DPF—otherwise, the machine is equipped with a size #3 DPF.

Decals

General Information and Application

GENERAL INFORMATION

CAUTION

ALWAYS read and follow the safety precautions on decals. Replace decals if they are damaged, or if the unit is repainted. If repainting, **BE SURE** that all applicable decals are affixed in their proper locations.

Decal locations information is provided to assist in the proper selection and application of new decals, in the event the original decals become damaged or the machine is repainted.

For correct replacement of decals, compare the location illustrations to your machine before starting to refinish the unit. Check off each required decal using the illustration reference number to find the part number, description and quantity in the list. Refer to the appropriate illustrations for replacement locations.

If there is a decal on a part that is to be replaced, be sure to order and affix the decal to the replacement part.

NEW DECAL APPLICATION

Before applying the new decals, surfaces must be free from dirt, dust, grease and other foreign material. To apply a solid-formed decal, remove the smaller portion of the decal backing paper and apply this part of the exposed adhesive backing to the clean surface while maintaining proper position and alignment. Slowly peel off the other portion of the backing paper while applying hand pressure to smooth out decal surface. To apply a masked decal, first remove the backing paper. Then, properly orient and position the decal onto the clean mounting surface. After the decal is firmly applied and smoothly pressed down, remove the front covering paper.

PAINT FINISH

Use this list to order paint for refinishing:

167788	One Gallon Yellow
167789	6 (12 oz. Spray Cans) Yellow
167754	One Gallon Gun-Metal Gray
167755	6 (12 oz. Spray Cans) Gun-Metal Gray

SAE BOLT TORQUE GUIDE

Use these torque values when tightening hardware—excluding: lock nuts, thread-forming, self-tapping, and metal screws—unless otherwise specified.

NOTE: All torque values are in foot-pounds (lb.-ft.), except those marked with asterisks (*), which are in inch-pounds (lb.-in.). To convert lb.-ft. to Newton Meter (Nm)—metric—torque values, multiply the lb.-ft. value by 1.355, or for inch pounds, multiply the lb.-in. value by 0.113.
