BOOM** **25** TON
CAPACITY

[†] Patented Grove feature

SUPERSTRUCTURE SPECIFICATIONS

BOOM— 32 ft.-106 ft. total length (9.8m-32.3m); 3 section trapezoidal main boom consistency of base section and 2 full power sections with positive cable synchronization to 80 ft. (24.4m) plus a 26 ft. (7.9m) "Swingaway" lattice extension (2° offset) to 106 ft. (32.3m). Mid section is powered by one 7 in. (178mm) bore diameter cylinder with integral holding valve. Fly section is extended by a 1-1/8 in. (29mm) diameter extension cable with 24-3/4 in. (629mm) tread diameter boom extension sheaves and retracted by a separate 5/8 in. (16mm) cable. Boom telescope sections are supported on graphite impregnated nylatron wear pads. Side adjustable wear pads prevent metal to metal contact of inner boom sections and permit ease of boom side alignment.

***JIB** — 22 ft. (6.7m) "A"-frame section attaches to sheave shaft of the 26 ft. (7.9m) triangular lattice "swingaway" boom extension. Jib stows beneath extension alongside base boom section or can be detached from "Swingaway" and held firmly in place on base section when extension is used independently. Jib can be offset from a minimum of 5° to a maximum of 30° and includes jib backstops, single rope self-equalizing suspension and removable pin type rope guard. NOTE - cannot be used with "telescopic swingaway" described below.

***BOOM EXTENSION** — 26 ft.-46 ft. (7.9m-14m) telescopic "Swingaway." 20 ft. (6.1m) rectangular roller mounted extension is manually extended and retracted from within 26 ft. (7.9m) lattice "Swingaway." (2° offset).

BOOM NOSE — Four sheaves, 13-3/4 in. (349mm) tread diameter, mounted on heavy duty tapered roller bearings (NOTE - Three sheaves used when Grove Model 25H-16 main hoist specified). Removable pin type rope guards permit easy reeving. Rope dead ends provided on each side of main boom base. NOTE - Cannot be used with 22 ft. "A"-frame described above.

***BOOM NOSE** — Single 13-3/4 in. (349mm) tread diameter sheave auxiliary boom nose mounted to main boom nose with removable pin type rope guard for single part line work.

BOOM ELEVATION — Single, 10 in. (254mm) bore, double-acting, hydraulic cylinder with integral holding valves; elevation from -4° to 75°. Combination controls provided for hand or foot operation.

* **LOAD MOMENT AND ANTI-TWO BLOCK SYSTEM (KRUGER)** — Audio-visual warning in combination with Grove control lever lockout of: hoist up, telescope out and boom down functions.

CAB — Full vision, all steel, fully enclosed, acoustically treated with tinted tempered safety glass throughout (removable front windshield with storage provision and hinged skylight are tinted laminated safety glass). Sliding left side door and sliding right

side window for ventilation. Adjustable full length control levers, combination hand and foot controls for swing and boom elevation. Fully adjustable operators seat with headrest. Complete engine instrumentation and controls. Combination hand and foot throttle. All-crane superstructure and outrigger controls, sight leveling bubble, electronic boom angle indicator, 20,000 BTU diesel fuel heater, electric windshield wiper, defroster fan and swing horn; door and window locks, domelight, dashlight, 3-3/4 lbs. (1.7kg) dry type fire extinguisher.

CAB INSTRUMENTATION — Engine oil pressure and water temperature gauges, voltmeter, tachometer, fuel level gauge, ignition-on indicator light.

SWING — Ball bearing swing circle, 360° continuous rotation. Grove planetary "glide swing" with foot actuated disc swing brake, hand operated turntable brake and 360° positive swing lock. Combination controls provided for hand or foot operation. Swing speed 2.7 RPM.

OUTRIGGER CONTROLS — Independently controlled in-out-up-and-down from superstructure cab. Sequence control arrangement virtually eliminates accidental outrigger actuation.

COUNTERWEIGHT — Stationary mounted on turntable.

HYDRAULIC SYSTEM:

RESERVOIR — 86 gallons (326 liters) capacity, all-steel welded construction with integral baffles, clean out access, magnetic drain plug and exterior oil sight level.

FILTER — Return line type, full flow with bypass protection and bypass indicator, replaceable cartridge. 25 micron rating.

PUMPS— Three section, gear type, PTO drive off transmission with disconnect operated from carrier cab. Combined capacity 112.5 GPM (426 lpm). Pumps are mounted so as to rotate in the same direction regardless of the transmission gear selection (forward or reverse); therefore, eliminating any possibility of pump cavitation resulting from operation in reverse gear.

CONTROL VALVES — Precision four-way, double-acting with integral load check, main and circuit relief valves. Three individual valve banks permit simultaneous independent control of three crane functions. Maximum operating pressure 2500 PSI (176kg/cm²).

POWER DISTRIBUTION — (Swing, outriggers — 26.5 GPM [100 lpm]) (Main hoist — 39.5 GPM [150 lpm]) (Boom elevation, telescope, auxiliary hoist, main hoist boost — 46.5 GPM [176 lpm]).

*Denotes optional equipment.

THE NEW

GROVE HOISTS . . . Both main and auxiliary hoists are of Grove design and manufacture except for the optional controlled free fall hoist. They are planetary gear drive, power up and down, equal speed with integral automatic brake. Hoisting and lowering speeds can be controlled from zero to maximum under all load conditions. The optional main hoist, model 25H-16, is a high speed hoist providing 470 FPM line speed with a line pull of 9,610 lbs. (4359kg).

TMS250A TRAPEZOIDAL[†] BOOM

The 80 ft. (24.4m) Trapezoidal Boom is full power incorporating a hydraulic cylinder plus a positive double cable/sheave arrangement. A single telescope cylinder powers both the mid and fly sections. The hydraulic/mechanical extension procedure insures positive synchronization for extension retraction of the telescoping sections.

**STRONG, LIGHT,
POSITIVELY
SYNCHRONIZED . . .
EXTREMELY
FAST.**

DESIGNED FOR OPERATOR-EFFICIENCY

. . . The interior of the all-steel cab is designed for operator convenience and efficiency. Full length control levers are adjustable and combination hand and foot controls are provided for swing, boom elevation and throttle. Full engine controls and instruments are provided. Other features include a sliding door, tinted safety glass windows, removable windshield and hinged skylight, acoustical treatment and electronic boom angle indicator.

18 FOOT OUTRIGGER SPREAD . . . Double-box beam outriggers, integral with the frame, provide an 18 ft. (5.5m) spread for maximum stability. Beams and jacks are independently controlled from the superstructure cab. Stowable, 24 in. (610mm) dia. steel outrigger pads assure excellent ground contact.

**5th layer of rope not recommended for hoisting operations. (6th layer for Model 25H-16 main hoist)
*Denotes optional equipment. Auxiliary hoist control valve arrangement is standard equipment.

CARRIER SPECIFICATIONS

GROVE CARRIER 6X4

OUTRIGGERS — Hydraulic, double-box telescoping beam outriggers front and rear 5-1/2 in. (140mm) bore diameter. Vertical jack cylinders are equipped with integral holding valves and 24 in. (610mm) dia. lightweight steel floats. Beams extend to 18 ft. (5.5m) centerline to centerline, retract to 8 ft. (2.4m) overall width by 3 in. (76mm) bore diameter extension cylinders. Complete controls and sight leveling indicator located in superstructure cab.

FRAME — High-strength steel, all-welded construction with box type design and integral welded outrigger boxes.

STEERING — Sheppard rack and pinion design with power assist.

CLUTCH — Lipe Rollway 14 in. (356mm), single plate dry disc. Lining area: 218 sq. in. (1407cm²).

TRANSMISSION — Fuller Roadranger RTO 613, 13 speeds forward and 3 reverse. Single lever shift control with 3 position air shift range selector; neutral safety start.

UNIVERSAL JOINTS — Needle bearing type.

AXLES — Front: Single non-driving I-beam, Rockwell FL-931, 18,000 lbs. (8165kg) capacity. Rear: Rockwell SLHD single reduction tandem, 34,000 lbs. (15 422kg) capacity with inter-axle differential and dash-mounted control.

SUSPENSION — Front: Reyco spring mounted with shock absorbers. Rear: Hendrickson solid mounted tandem.

FUEL TANK — Single 60 gallons (227 liters) capacity mounted on left side of frame.

TIRES — Front: (2) 15x22.5—16 ply rated duplex hi-way tread, tubeless (12:00x20 radial or 16.5x22.5 tires—optional). Rear: (8) 9:00x20—10 ply rated hi-way tread, tube type (9:00x20 radial, 10:00x20, 15:00x22.5 or 16.5x22.5 duplex singles—optional).

SPEED AND GRADEABILITY

Engine	Speed Ranges	% of Gradeability (@ Max. Torque)
Cummins V8-210	3.59 to 65.11 MPH (5.8 to 104.8km/h)	35.38 to .53%
*GM6V-53N	3.35 to 60.81 MPH (5.5 to 98km/h)	40.69 to .33%
*Caterpillar 3208	3.35 to 60.81 MPH (5.4 to 98km/h)	41.16 to .35%

NOTE: Performance based on 48,000 lbs. (21 773-kg) GVW and standard SAE engine rating conditions using standard tires, transmissions and axles. Performance data may vary plus or minus 10% due to variations in engine performance and vehicle weights. Maximum vehicle speed restricted to 50 mph (80.5km/h) with standard 900 x 20-10 ply rated dual rear tires, 60 mph (96.5km/h) with optional rear tires.

WHEELS — Front: Steel spoke, 12.25 in.x22.5 in. rims (311mmx572mm). Rear: Steel spoke, 7 in.x20 in. rims (178mmx508mm).

BRAKES — Full air on all wheels with air dryer. Total lining area: 1256 sq. in. (8104cm²).

Front: 15 in.x6 in. (381mmx152mm). Rear: 15 in.x7 in. (381mmx178mm) "Complies with FMVSS121 (Air Brake Systems)".

PARKING BRAKE — Spring set emergency chambers on both rear axles with dash mounted release kit.

ELECTRICAL SYSTEM — 24-volt starting, 12-volt lighting. U.S. federal safety standard lights and reflectors.

CAB — One man, all-steel with acoustical treatment; tinted tempered safety glass (windshield is tinted laminated), electric windshield washer, wiper and defroster fan, door and window locks. Bostrom T-bar seat with belt, dual rear view mirrors, dome-light, dashlight, hot water heater, electric horn, traffic hazard warning switch (four-way flasher) complete engine instrumentation and carrier driving controls, 3-3/4 lbs. (1.7kg) dry type fire extinguisher.

CAB INSTRUMENTATION — Electric tachometer, engine oil pressure and water temperature gauges, voltmeter, speedometer, air pressure gauge, electric fuel gauge, high beam indicator, low air pressure audio-visual warning, ignition-on indicator, pump engaged indicator.

MISCELLANEOUS STANDARD EQUIPMENT — Wheel nut wrench and handle, channel front bumper, two front towing loops, front and rear fenders, ether injection starting aid (less canister), mud flaps, sling box, boom rest, hookblock tie down.

Constant improvement and engineering progress makes it necessary that we reserve the right to make specification, equipment, and price changes without notice. Illustrations shown may include optional equipment and accessories and may not include all standard equipment. Meets requirements of P.C.S.A. Standard No. 2.

NOTE: Dimensions in parenthesis are millimeters (mm).

THE TMS250A is a smooth performer with the precise handling and built-in reliability for which Grove Cranes are internationally known. It is the combined product of an outstanding research and design group and produced by a manufacturing team second to none. From the wheels up it is designed and built by Grove to give you the high availability and lasting quality you expect from the industry leader. And, no matter where your TMS250A is working, you know there is a reliable Grove distributor nearby ready to give service when needed.
