Articulating Crane

► 15/105 Articulating Crane

Strength and reach come together in our 15/105 articulating cranes, with a max lifting capacity of 12,125 lb (5500 kg) for the SL model and 13,740 lb (6110 kg) for the DL model. A horizontal reach of 56 ft 5 in (17.2 m) make both of these compact cranes high-performing, must-have pieces of equipment for your job sites. What's more, they have hexagonal booms for greater strength and stability, the ability to stow within themselves, and unique features and options for easy operation.

Hexagonal Boom Design

A wide hexagonal profile with large bearing surfaces ensures greater strength and stability for horizontal and vertical spans — even when working in extreme positions with long reaches. Plus, it’s protected by powdercoat paint that never fades, flakes, or corrodes.

Internal Hose Routing

Fed internally through protective nylon drag chains or roller guides, all hoses are equipped with sturdy, high-pressure swivel couplings to prevent them from twisting.

Overbending

Overbending between the main boom and jib provides greater flexibility when working under power wires and more potential for high lifting in narrow passages. It also lowers the total height when the loader is stowed over the truck body.

Stow Bracket Innovation

The stow bracket is designed to secure the boom for transport position but not allow for bracket damage. Unlike systems with rigid fixed brackets, the “J” hook will pivot if an incorrect movement is attempted.
