Articulating Crane

► 80/565 Articulating Crane

Choose IMT® 80/565 articulating cranes for exceptional performance in extreme conditions. With a maximum horizontal boom reach of 67 ft (20.5 m) and a max lifting capacity of 38,185 lb (17,320 kg), 80/565 cranes offer a superior lift-to-weight ratio, long-reach capabilities, and maximum control. Plus, they're available with a variety of options — making them the perfect articulating cranes for a wide a range of heavy-duty applications.

* Crane rating (ft-lb) is the rated load (lb) multiplied by the respective distance (ft) from centerline of rotation with all extensions retracted and the inner and outer booms in a horizontal position, per ANSI B30.22. ** Crane weight is for standard crane with tank & 8-bolt long mounting kit. Does not include stabilizers, tank or oil. ***Longer reach version also available.

Standard Features

- Radio remote control
- Double link arm system
- Application-specific product offering
- Superior lift-to-weight ratio
- Long-reach capabilities
- Hexagonal booms for superior reach and maximum control
- Internal hose routing
- 15° overbending on outer boom
- Oil cooler
- Continuous rotation

Options

- Various stabilizer configurations
- Boom mounted winch
- Floodlight on outer boom
- Boom tip functions for hydraulic attachments

Hexagonal Boom Design

A wide hexagonal profile with large bearing surfaces ensures greater strength and stability for horizontal and vertical spans — even when working in extreme positions with long reaches. Plus, it's protected by powdercoat paint that never fades, flakes, or corrodes.

Internal Hose Routing

Fed internally through protective nylon drag chains or roller guides, all hoses are equipped with sturdy, high-pressure swivel couplings to prevent them from twisting.

Overbending

Overbending between the main boom and jib provides greater flexibility when working under power wires and more potential for high lifting in narrow passages. It also lowers the total height when the loader is stowed over the truck body.

Stow Bracket Innovation

The stow bracket is designed to secure the boom for transport position but not allow for bracket damage. Unlike systems with rigid fixed brackets, the "J" hook will pivot if an incorrect movement is attempted.

Power Source

- Standard integral-mounted piston hydraulic pump and PTO application

Cylinder Holding Valves

- Integral-mounted counterbalance valves or load-holding check valves
- Prevention of sudden cylinder collapse in case of hose failure

Rotation System

- 360 degree continuous rotation through planetary gear box
- 57,865 ft-lb (8 tm) rotational high-torque hydraulic motor
- Hydraulic brake included

Hydraulic System

- Open-centered system — closed optional
- Regeneration system available on all cylinders to ensure quick deployment
- Hydraulic oil reservoir, air breather, replaceable return-line filter and control valve

Overload System

- Load-limiting capability for boom functions
- Rated capacity limitation (RCL) 5300 blocks load-increasing functions when full capacity is attained

Nothing Says Commitment Like The Diamond.™

IMT has been meeting the needs of our customers for over 50 years and none of it would have been possible without a distributor network that's second to none. IMT distributors offer fast, knowledgeable service and the ability to help customers find the right product for every application. When you're looking for reliable equipment and dependable service, remember IMT.
