

LIBERATOR *Wireless*

Remote Control

Compact receiver has integrated antenna. Unit mounts on the valve cover and plugs into the remote pendant receptacle.

Small but powerful transmitter runs for months on 2, AAA batteries.

Order as an option on your new Liberator crane or add to your existing Liberator!

Now you can have the freedom of a reliable wireless Remote Control at an affordable price! This system proves that great things come in small packages. The small ergonomic transmitter can be operated with one hand leaving the other hand free. It is small enough to put in your shirt pocket, to hang around your neck on the supplied lanyard or hang on your belt using the integral belt clip!
