

KOBELCO

# Hydraulic Crawler Crane **CK550** A TOUCH OF THE FUTURE!

## Specifications

Max. lifting capacity: 55 US tons at 10.5 ft

Max. total length (boom + jib): 190 ft

Max. boom length: 160 ft

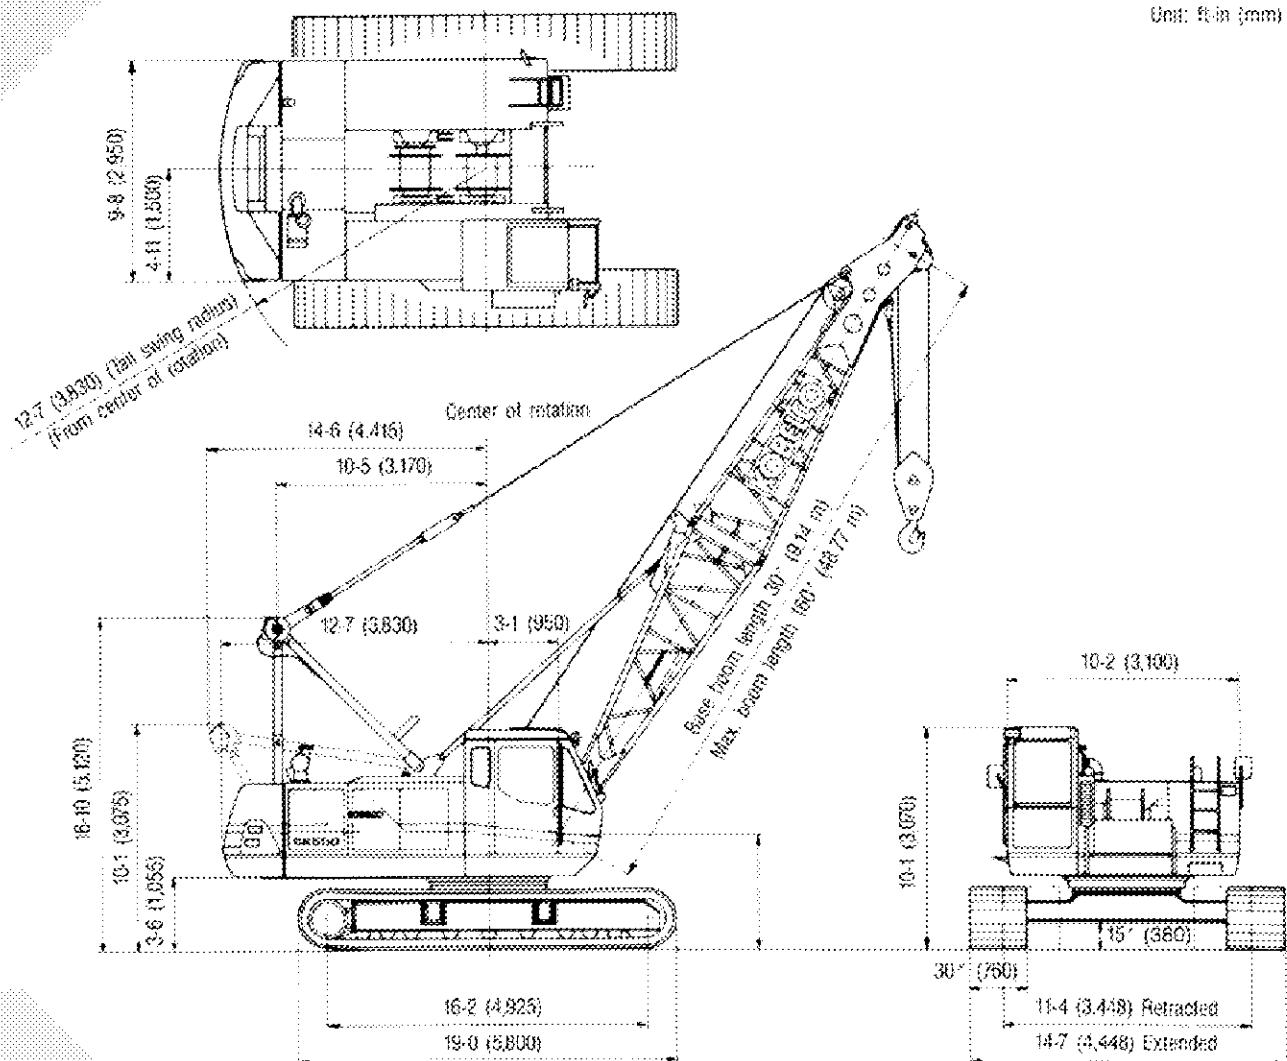

**KOBE STEEL, LTD.**

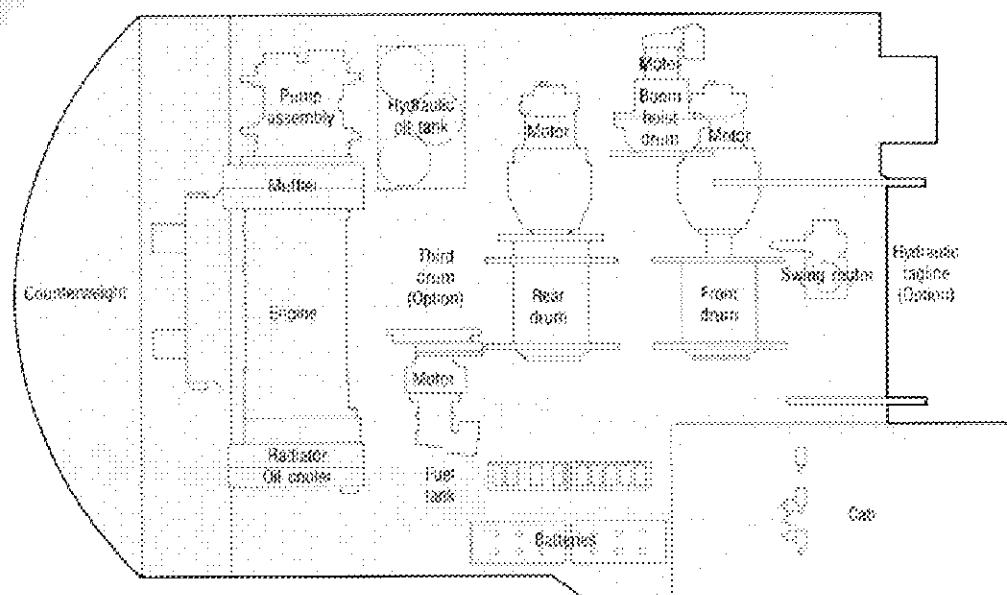

# General Dimensions

Unit: ft-in (mm)

## Upper Machinery Layout

# Specifications

## UPPER MACHINERY

### Power Plant

Model	Mitsubishi 6D15T diesel
Type	Water cooled, direct fuel injection, with turbocharger
No. of cylinders	6
Bore and stroke	4.4" (113 mm) x 4.5" (115 mm)
Displacement	422 cu in (6,919 cc)
Rated power	153 hp (114 kW) SAE NET at 2,150 rpm (SAE J 1349)
Max. torque	568 N-m (58kgf-m) at 1,600 rpm (SAE J 1349)
Starter	24V, 4.5 kW
Generator	24V, 80 amp
Cycles	4
Radiator	Corrugated fin type core, thermostat controlled
Air cleaner	Two stage, dry
Batteries	Two 12 V, 150 A-hr capacity batteries, series connected
Fuel tank capacity	74 US gal (280 liters)

### Boom Hoisting System

Powered by a hydraulic axial piston motor through a planetary reducer.

**Brake:** Spring-set, hydraulically released multiple-disc brake, mounted on the boom hoist motor and operated through a control valve.

**Drum lock:** Spring-set hydraulically released drum pawl, automatically actuated when boom is stopped.

**Drum:** One-piece cast drum, grooved for 5/8" (14 mm) dia. wire rope.

**Line speed (Single line on first drum layer):**

Hoisting (max.) ..... 223 ft/min (68 m/min)

Lowering (max.) ..... 223 ft/min (68 m/min)

### Load Hoist System

Tandem drums powered independently by two hydraulic axial piston motors through a planetary reducers.

**Clutches:** Internally expanding band clutches (splined on shaft).

24.5" (622 mm) dia. x 3.5" (98 mm) wide drum.

**Brakes:** Brake valves and externally contracting, spring-set, hydraulically released band brakes with both positive and negative actuation.

31.5" (800 mm) dia. x 4" (102 mm) wide drum.

**Drum locks:** Manual safety pawls (external ratchets).

**Drums (front and rear):** 16.5" (420 mm) P.O.D. x 16.9" (430 mm) wide drums, each grooved for 3/4" (20 mm) wire rope.

**Wire rope length:** ..... 558 ft (170m)

**Wire rope storage capacity:** ..... 886 ft (270m)

**Line speed (Single line on the first drum layer):**

High ..... 230 ft/min (70 m/min)

Low ..... 115 ft/min (35 m/min)

### Swing System

**Swing unit:** Independently powered by a hydraulic plunger motor through a planetary reducer; 360° of rotation.

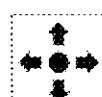

**Max. swing speed** ..... 3.5 rpm

**Swing circle:** Single-row ball bearing with internal swing gear. Bolted to both upper structure and under carriage.

**Swing lock:** Two-position pin-in-hole lock (manual).

**Brake:** Spring-set, hydraulically released multiple-disc brake, mounted on the swing motor.

### Hydraulic System

**Pumps:** Three variable displacement plunger pumps and one gear pump are used. Two variable displacement plunger pumps are used in the propel circuits, boom hoist circuit and load hoist circuit. The other is used in the swing circuit and crawler extension circuit. The gear pump is used in the control system. Two plunger pumps are controlled by the Engine Speed Sensing (ESS) system, which automatically varies horsepower distribution according to work load. This system controls hydraulic oil flow and puts power where it's needed without wasting energy. The end result is highly efficient operation that utilizes 100% of engine's power.

**Control:** Horsepower summation hydraulic control system provides infinitely variable pressure to front and rear drums, boom, hoist brakes and clutches. Response to the operator's touch is instant, positive and smooth.

#### Pressure:

Load hoist, boom hoist and propel system ..... 4,120 psi (290 kg/cm<sup>2</sup>)  
Swing system ..... 3,200 psi (225 kg/cm<sup>2</sup>)  
Control system ..... 1,490 psi (105 kg/cm<sup>2</sup>)  
Hoist drum brake system ..... 1,490 psi (105 kg/cm<sup>2</sup>)  
Reservoir capacity ..... 66 US gal (250 liters)

**Cooling:** Oil-to-air heat exchanger, mounted in front of radiator.

**Filtration:** Suction strainer, in-line strainer, return filter, and drain filters

## Operator's Cab

Totally enclosed, full-vision cab fitted with safety glass and a sliding front window. A fully adjustable, high-backed seat permits all operators to set ideal working position. Signal horn, cigarette lighter, ashtray, windshield wipers, washer, floor mat and cab heater are standard features.

## Controls

Response to the operator's touch is instant, positive, and smooth.

### Check and Safety Monitor

**Gauges:** Hourmeter, water temperature, fuel, and tachometer

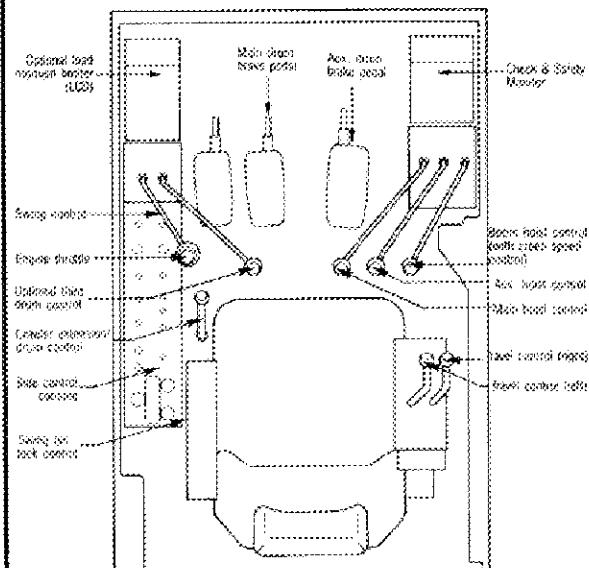

**Warning lamps:** Charge, fuel level, control pressure, hydraulic oil temperature, water temperature, engine oil pressure, engine oil filter, CPU, and main hoist brake switch

**Safety lamps:** Cooling water (subtank) level and engine oil level

**Lever locks:** Aux. drum control, boom control, main drum control, optional third drum control, and travel control

**Others:** Swing lock (pin) and Drum lock (pawl)

Optional load moment Indicator

## Mechatronic functions include

**ESS (Engine Speed Sensing)** Ensures full use of engine power at all times.

**SensaTouch Control** Permits operator to "feel" the movement and weight of the load through the control lever.

### An Ultra Slow-Speed Changeover Device Switch

Provides accurate and smooth hoisting and travel at low speed for bolt matching, pile placement, and other delicate operations.

## Gantry

Two-position, telescopic gantry, raised and lowered by boom hoist rope.

## Counterweight

Three-piece, mounted behind the machinery compartment.

Total weight ..... 33,180 lb (15,050 kg)

Counter-weight	Dimension ft-in (mm)	Weight
No. 1	9-8 (2,950) x 4-1 (1,250) x 18" (455)	9,150 lb (4,150 kg)
No. 2	8-11 (2,730) x 4-1 (1,250) x 21" (520)	12,680 lb (5,750 kg)
No. 3	9-8 (2,950) x 4-1 (1,250) x 32" (810)	11,355 lb (5,150 kg)

NOTE: No.2 and No.3 counterweights are self-removable.

## Tools

Tool set and accessories for routine machine maintenance.

## Weight

**Operating weight:** Approx. 97,800 lb (44,200 kg) including 30 ft (9.14 m) boom, and standard counterweights

**Ground pressure** ..... 8.1 psi (0.57 kg/cm<sup>2</sup>)

# LOWER MACHINERY

**Carbody:** Steel-welded carbody made of high strength with axles mated to crawler frames.

**Crawler:** Side frames can be hydraulically extended for wide-track operation or retracted for transportation. Extension cylinders operated with a valve in the upper control system. Crawler belt tension adjusted with hydraulic jack and maintained by shims between idler block and frame.

**Crawler drive:** Independent hydraulic propel drive built into each side frame, each with a piston motor propelling a driving wheel through a planetary gear box.

**Crawler brakes:** Brake valves and spring-set, hydraulically released multiple-disc parking brakes.

**Steering mechanism:** Differential speed steering (driving one track faster than the other), counter-rotating steering (driving tracks in opposite directions) and skid steering (driving one track only) with lever control.

**Track rollers:** 9 lower rollers in each side frame, high strength thrust plates on each top of crawler frames.

**Shoes:** Track link type

**Number** ..... 59 each side

**Standard flat shoe width** ..... 30" (760 mm)

**Optional flat shoe width** ..... 36" (914 mm)

**Max. travel speed** ..... approx 1 mph (1.4 km/h)

**Max. gradeability** ..... 40%

## Jib (optional)

Welded lattice construction using tubular, high tensile chords with pin connections between sections.

<b>Max. lifting capacity</b>	5.5 US tons
<b>Max. jib length</b>	60 ft (18.29 m)
<b>Max. total length</b> (Boom length+jib length)	130 ft 60 ft (39.62 m) + (18.29 m)

Jib	Weight lb (kg)
Jib Tip	375 (170)
Jib Base	290 (130)
Insert (10 ft)	210 (95)
Insert (20 ft)	365 (165)

## Hook Blocks (Recommended)

Arrange of hook blocks can be specified, each with a safety latch.

<b>Safety working limit</b> (us tons)	6.25	20.0	30.0	55.0
<b>Weight</b> (lb)	240	580	650	1100

## Wire rope specifications

### Standard:

Load hoist

6 x 25 FW IWRC (7 x 7) ..... 3/4" (20 mm)

Boom hoist (12-part line)

6 x 26 WS IWRC (7 x 7) ..... 9/16" (14 mm)

Boom pendants (2-part line) ..... 1 1/8" (28 mm)

### Optional:

Jib hook hoist ..... 3/4" (20 mm)

Jib back stay pendants ..... 11/16" (18 mm)

Boom backstops recommended for all boom lengths.

## Line pull (for Crane, dragline and clamshell)

	<b>Max. permissible</b>	<b>Max. available</b>
Front	16,800 lb	35,273 lb
Rear	16,800 lb	35,273 lb

NOTES: Max. available line pulls are not based on wire rope strength. See note page 6 for max. rated single part of line working loads.

Note: Please consult your local dealer for details concerning which features are standard and which are optional.

# ATTACHMENT

## Boom

Welded lattice construction using tubular, high tensile steel chords with pin connections between sections. Boom tip is open throat construction. Two idler sheaves and four point sheaves are provided as standard.

<b>Max. lifting capacity</b>	55 US tons
<b>Basic boom length</b>	30 ft (9.14 m)
<b>Max. boom length</b>	160 ft (48.77 m)

Boom	Weight lb (kg)
Boom Tip	2,050 (930)
Boom Base	1,300 (590)
Insert (10 ft)	530 (240)
Insert (20 ft)	950 (430)
Insert (30 ft)	1,260 (570)

# NOTES!

## Warnings!

The following points should be kept in mind when interpreting the load rating charts.

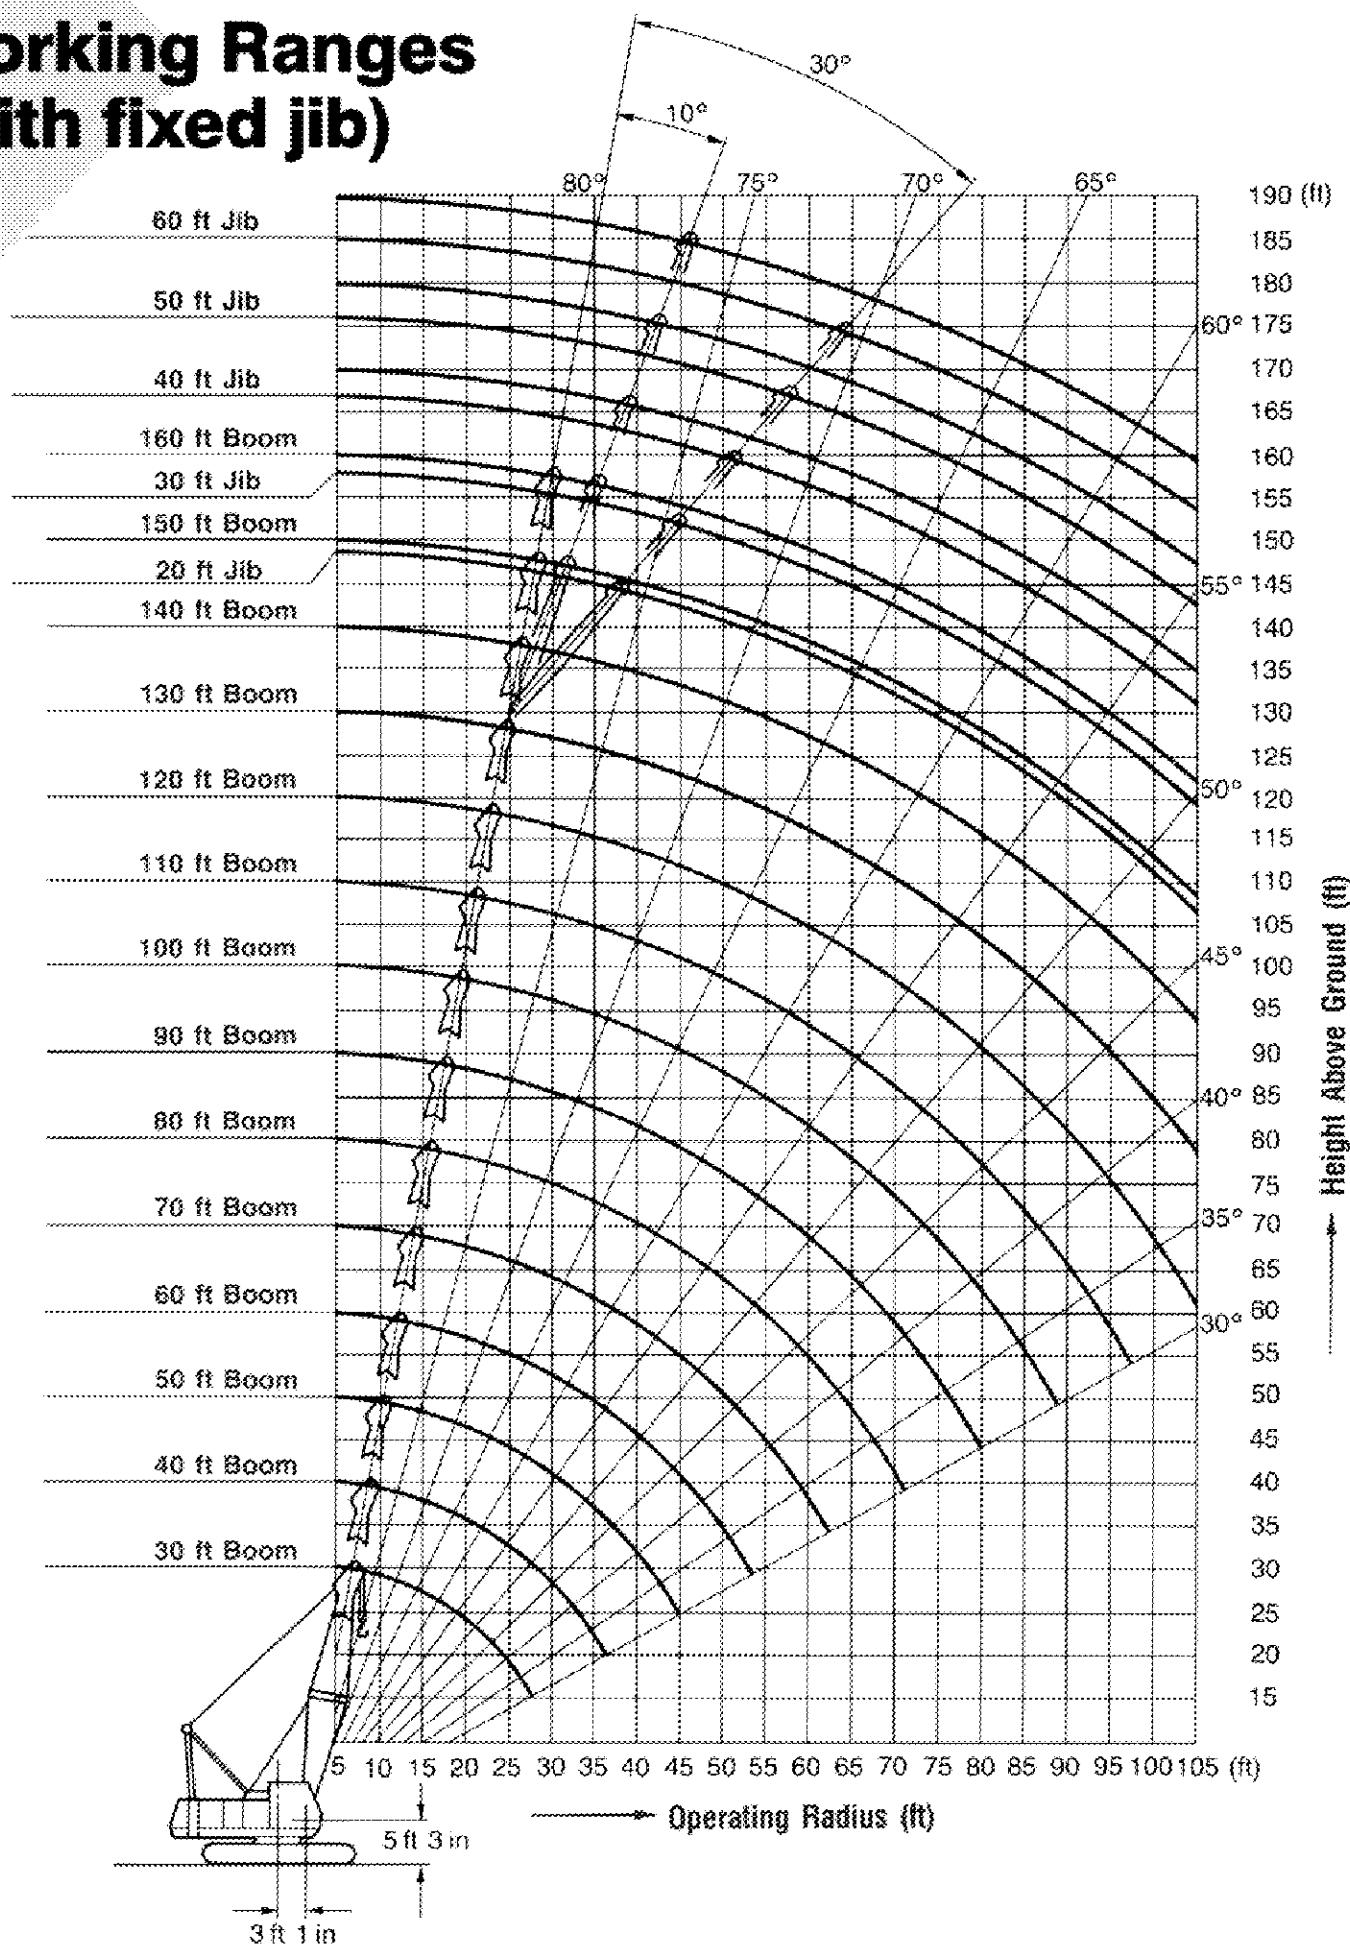

1. Rated loads included in the charts are the maximum allowable freely suspended loads at a given boom length, boom angle and load radius, and have been determined for the machine standing level on firm supporting surface under ideal operating conditions. The user must limit or de-rate rated loads to allow for adverse conditions (such as soft or uneven ground, out-of-level conditions, wind, side loads, pendulum action, jerking or sudden stopping of loads, inexperience of personnel, multiple machine lifts, and traveling with a load).
2. Capacities are based on factors other than machine stability such as structural strength or 75% of minimum tipping loads, whichever is smaller.
3. Max. rated single line pull is 12,566 lb at 221 FPM when using in one to seven parts of line, 13,800 lb in eight parts of line.
4. The machine must be reeved and set-up as stated in the operation manual and all the instruction manuals if these manuals are missing, obtain replacements.
  - \* Boom backstops are required for all boom lengths.
  - \* Gantry must be in fully raised position for all operations.
  - \* Crawlers must be fully extended and be locked in position.
  - \* The crane must be leveled to within 1% on a firm supporting surface.
5. Attempting to lift more than rated loads may cause machine to tip or collapse. Do not tip machine to determine capacity.
6. Weight of hooks, hook blocks, slings and other lifting devices are a part of the total load. Their total weight must be subtracted from the rated load to obtain the weight that can be lifted.
7. When lifting over boom point with jib or auxiliary sheave, rated loads for the boom must be deducted as shown below.

Jib Length	Aux. sheave	20 ft (6.10 m)	30 ft (9.14 m)	40 ft (12.19 m)	50 ft (15.24 m)
Deduct	330 lb (150 kg)	1,760 lb (800 kg)	1,980 lb (900 kg)	2,200 lb (1,000 kg)	2,430 lb (1,100 kg)

8. The total load that can be lifted over a jib is limited by rated jib loads.
9. Boom lengths for jib mounting are 90 ft. (27.43 m) to 130 ft (39.62 m).
10. An auxiliary sheave cannot be used on a 160 ft (48.77 m) boom length.
11. The boom should be erected over the front of the crawlers, not laterally.
12. Least stable position is over the side.
13. Lifting capacities listed apply only to the machine as originally manufactured and designed by KOBE STEEL, LTD. modifications to this machine or use of equipment other than that specified can reduce operating capacity.
14. Designed and rated to comply with ANSI Code B30.5.

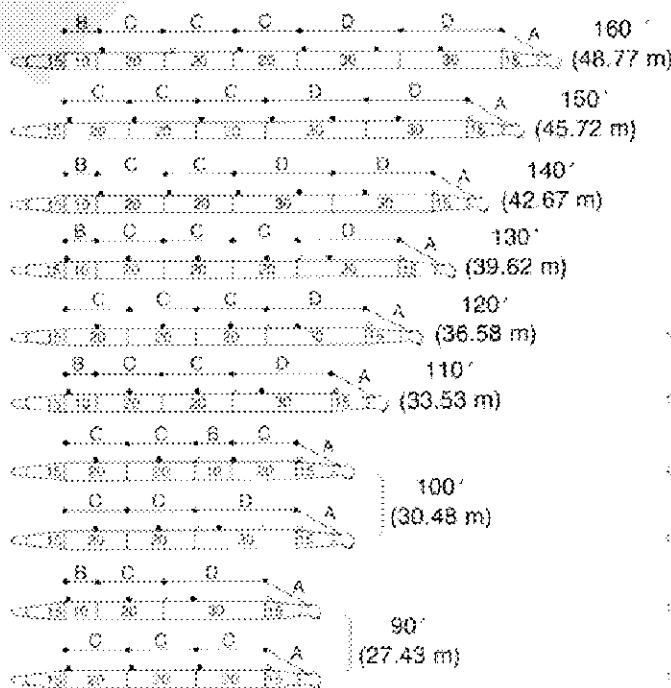

# Working Ranges (with fixed jib)

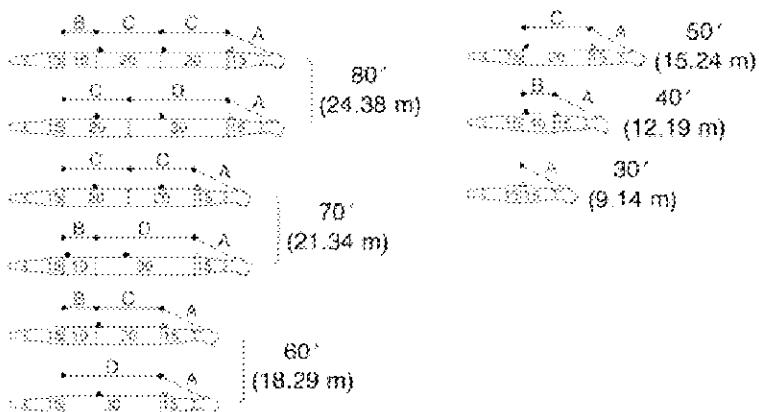

# Boom And Guy Line Arrangement

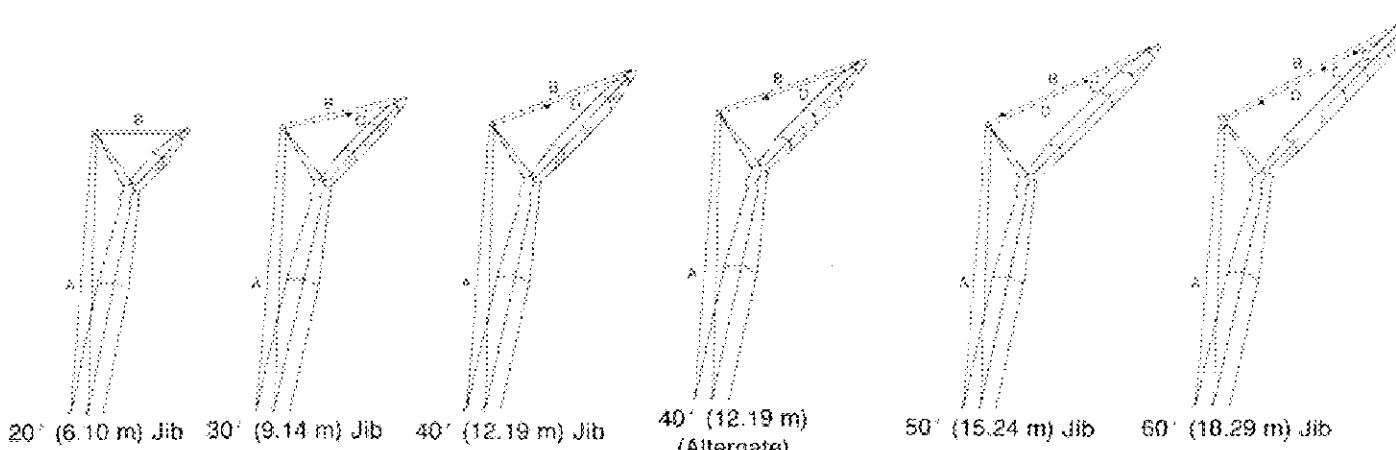

Symbol	Dimensions of Guy Line		
	Diameter in (mm)	Length ft-in (m)	
A	1 1/8 (28)	13-7 (4.14)	
B	1 1/8 (28)	10-0 (3.05)	
C	1 1/8 (28)	20-0 (6.10)	
D	1 1/8 (28)	30-0 (9.14)	

For most efficient use of this machine, boom and guy line arrangement must be correctly observed as shown in this figure.

- Location of jib backstay anchor
- Location of cable roller on boom tip
- Location of cable roller on boom insert

# Jib And Jib Guy Line Arrangement

This figure shows the arrangement when the jib offset angle is 10 degrees.

When setting the offset angle to 30 degrees, add the additional guy line A' to the boom side guy line A.

# Clamshell

## Boom

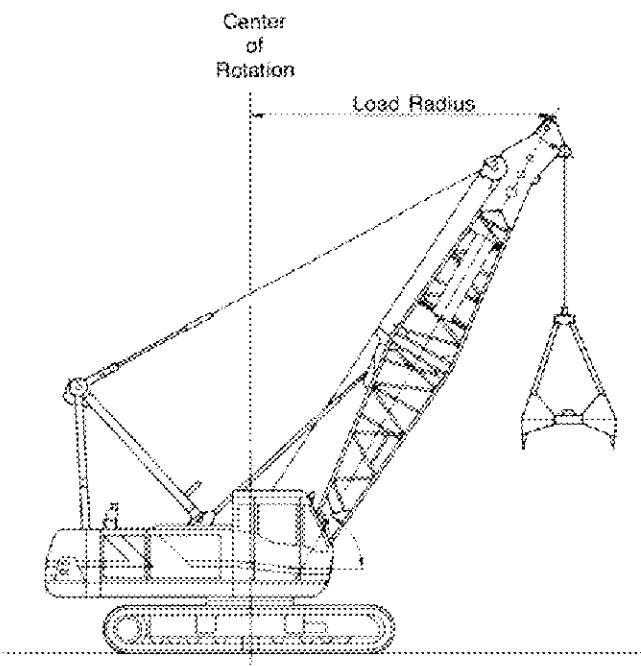

Welded lattice construction using tubular, high tensile steel chords with pin connections between sections.

Basic boom length ..... 30 ft (9.14 m)  
 Max. boom length ..... 60 ft (18.29 m)  
 Open throat with offset boom point sheaves on antifriction bearing, bottom diameter ..... 1' 4" (0.4 m)  
 Limit on clamshell bucket weight ..... 4,600 lb (2,100 kg)  
 Optional tagline: Hydraulic operated type and spring type.

## Boom Component Chart

Boom length ft (m)	Boom arrangement
40 (12.19)	Base-A-Tip
50 (15.24)	Base-B-Tip
60 (18.29)	Base-A-B-Tip

Base=15 ft (4.57 m) Tip=15 ft (4.57 m)  
 Inserts: A=10 ft (3.05 m), B=20 ft (6.10 m)

## Rated Load

1. No. of Counterweight: 2
2. Position of Crawlers: Extended

	48.0	-14.0	15500		50.0	39.5	10440

### Notes

1. Figures represent maximum allowable capacity and assume level, firm ground and ideal working conditions.
2. Capacities are calculated at 67.5% of the minimum clamshell tipping load.
3. Capacities are the maximum recommended by PCSA Standard #4. Allowances must be made by the user for such unfavorable conditions as a soft or uneven supporting surface, rapid cycle operations, or bucket suction.
4. The combined weight of the bucket and load must not exceed these capacities.
5. Do not operate the clamshell using boom angles of less than 30 degree.
6. Boom length for clamshell operation should not exceed 60' (18.29 m).
7. Consult your authorized distributor for rated loads during rapid cycle operations.

# Dragline

## Boom

Welded lattice construction using tubular, high tensile steel chords with pin connections between sections.

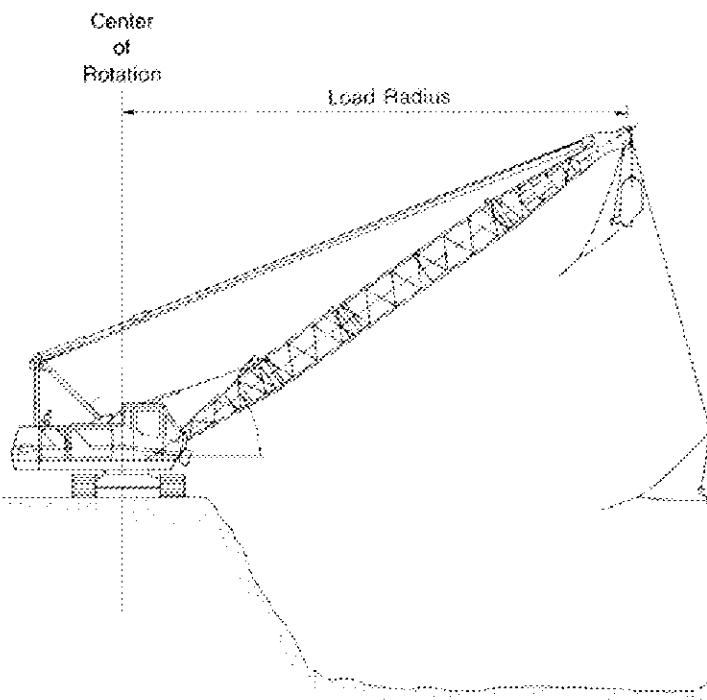

Basic boom length ..... 30 ft (9.14 m)  
 Max. boom length ..... 60 ft (18.29 m)  
 Open throat with offset boom point sheaves on antifriction bearing, bottom diameter .... 1' 4" (0.4 m)  
 Limit on clamshell bucket weight . 4,800 lb (2,100 kg)  
 Optional tagline: Hydraulic operated type and spring type.

### Notes

1. Figures represent maximum allowable capacity, and assume level, firm ground and ideal working conditions.
2. Capacities are calculated at 67.5% of the minimum dragline tipping load.
3. Capacities are the maximum recommended by PCSA Standard #4. Allowances must be made by the user for such unfavorable conditions as a soft or uneven supporting surface, rapid cycle operations, or bucket suction.
4. The combined weight of the bucket and load must not exceed these capacities.
5. Do not operate the dragline using boom angles of less than 30 degree.
6. Boom length for dragline operation should not exceed 60' (18.29 m).
7. Consult your authorized distributor for rated loads during rapid cycle operations.

## Features

### Overall Features

- Mechatronic ESS makes full use of engine power and prevents stalls.
- Advanced hydraulic system provides exact and stable hydraulic flow to all functions for excellent productivity.
- Ample power and stability to accommodate vibratory hammer attachments.
- Available line pull of 35,300 lbs. makes sheet pile removal easy and quick.
- Sleek, rounded styling is enhanced by a full complement of operator amenities.
- Various anti-noise measures keep onsite noise levels down to a mere 60 dB (A)/100 ft.
- Small tail swing radius and compact overall dimensions provide efficient operation in tight spaces.
- High counterweight ground clearance assures unobstructed swing.
- Low-profile rear guard improves lateral and rear visibility.

### Upper Machinery

- Uniform large-capacity drums make clamshell work much easier.
- Powerful brake drum with heat-radiating fins ensures safe, jerk-free performance during continuous operation.
- Independent swing pump provides powerful and fast swing during simultaneous attachment operation.
- Well-balanced, quick swing response ensured by a direct, spool-controlled swing circuit.
- Standard auxiliary hydraulic power source can be used with optional third drum for auger, drill, or vibratory hammer.
- Rubber-cushioned boom backstop reduces noise and vibration during vibratory hammer operation.
- Self-removable counterweight makes disassembly possible without using external equipment.
- Tough frame construction has proven durable enough to withstand one million load tests.

### Lower Machinery

- Low center of gravity keeps the machine stable when lifting over the side.
- Heavy-duty track links assure steady, sure-footed travel.
- Smooth, powerful crawler extension and retraction mechanism features a semi-automatic lock.
- Straight-propel travel system keeps the machine on track during simultaneous attachment or swing operation.
- Travel motors are mounted within the shoe width to protect them from shocks and debris.

### Cab and Controls

- Sensalouch Control with hydraulic pilot system allows the operator to feel the movement of the load through the control lever.
- Sensalouch Control provides direct, sensitive control of the swing for exact positioning.
- An ultra slow-speed changeover device makes inching control easy and precise for hook work, boom hoist, and travel.
- Electric throttle on the swing lever provides light, accurate engine control.
- Excellent upward visibility provided by a pop-up skylight and a sliding upper front window that can be stored in the cab ceiling.
- Downward field of vision kept clear by a removable lower front window.
- Tinted glass windows and snug-fitting cab door keep the cab interior comfortable and quiet.
- Cloth-covered, tilt-adjustable seat helps the operator maintain a comfortable and relaxed posture.

### Attachment

- Fast hook and boom hoisting speeds ensure reduced cycle times on construction projects.
- Spreader features automatic storage and allows boom and guy cables to be connected easily.
- Optional auxiliary sheave features simplified cable reeving.
- Double-tapered boom pins can be inserted and removed safely and efficiently without standing under the base boom.
- Long-tapered guy cable pin and lightweight connectors facilitate assembly.

### Maintenance and Safety

- Electronic monitor continuously checks 17 machine functions and alerts the operator of potential problems.
- Swing flashers and rear light alert onsite workers of the machine's next move for improved safety.
- Lever lock system helps prevent accidental operation when the operator enters or leaves the cab.
- Free-fall interlock eliminates accidental activation of free-fall.
- Optional hoist load moment indicator helps to keep operation within safe limits at all times.
- Slip-proof steps and center guards provided as standard equipment on the lower frame.
- Large toolbox, grease gun holder, and hydraulic check port provided as standard equipment.

**NOTE:** Due to our policy of continual product improvement, all designs and specifications are subject to change without advance notice.
