Technical description

Engine

Water cooled, V-8-cylinder Liebherr diesel engine, turbo charged with intercooler, model D 9408 TI-E, power rating according to ISO 9249, 400 kW (544 hp) at 1900 rpm.

Engine complies with NRMM exhaust certification EPA / CARB Tier 2 and 97/68 EC Stage II

Option:

Water cooled, V-12-cylinder Mercedes Benz diesel engine, turbo charged with intercooler, type OM 444 LA, power rating according to ISO 3046 IFN, 605 kW (812 hp) at 1900 rpm.

Fuel Tank: 920 l capacity with continuous level indicator and reserve warning.

Engine complies with NRMM exhaust certification EPA / CARB Tier 1

Hydraulic system

The main pumps are operated by a distributor gearbox. Axial piston displacement pumps work in closed and open circuits supplying oil only when needed (flow control on demand). To minimize peak pressure an automatically working pressure cut off is integrated. This spares pumps and saves energy. Max. working pressure: 350 bar.

Hydraulic oil tank capacity: 1100 l

The hydraulic oil is cleaned through electronically controlled pressure and return filters. Possible contamination is signaled in the cabin. The use of synthetic environmentally friendly oils is possible. Ready made hydraulic retrofit kits are available to customize requirements e. g. powering casing oscillators, auger drills etc.

Boom winch

Line pull _____ max. 2x 70 kN

Rope diameter _____ 20 mm

Boom up _____ 84 sec. from 15° to 82°

Swing

Consists of rollerbearing with external teeth for lower tooth flank pressure, fixed axial piston hydraulic motor, spring loaded and hydraulically released multi-disc holding brake, planetary gearbox and pinion.

Swing speed from 0 – 3.6 rpm continuously variable, selector for 3 speed ranges to increase swing precision.

Standard:

Second swing drive

Noise emission

Noise emissions correspond with 2000/14/EC directive on noise emission by equipment used outdoors.

Main winches

Winch options:

Line pull (nom. load) _____ 200 kN _____ 250 kN _____ 300 kN

Rope diameter : _____ 30 mm _____ 34 mm _____ 36 mm

Drum diameter : _____ 630 mm _____ 750 mm _____ 820 mm

Rope speed (m/min) _____ 0-85 _____ 0-69 _____ 0-55

With change gear box (m/min) _____ 0-123 _____ 0-119

Rope capacity 1st layer _____ 46.5 m _____ 45.9 m _____ 45.9 m

The winches are outstanding in their compact design and easy assembly. Clutch and braking functions on the freefall system are provided by a compact designed, low wear and maintenance free multi-disc brake. The drag and hoist winches use pressure controlled, variable flow hydraulic motors. This system features sensors that automatically adjust oil flow to provide max. winch speed depending on load.

Option:

Auxiliary winch 100 kN in boom foot.

Crane winch (main winch) 160 kN with multi-disc holding brake.

Crawlers

The track width of the undercarriage is changed hydraulically. Propulsion through axial piston motor, hydraulically released spring loaded multi-disc brake, maintenance free crawler tracks, hydraulic chain tensioning device. Flat or 2 web track shoes. Drive speed 0 – 1.3 km/h.

Option:

2 speed hydraulic motor for higher travel speed.

Control

The control system – developed and manufactured by Liebherr – is designed to withstand extreme temperature changes and the rough heavy duty tasks common in the construction industry. Complete machine operating data are shown on a high resolution display. The crane is equipped with proportional control for all movements, which can be carried out simultaneously. A special "Interlock" control system is also optionally available. It is designed for power lifting of the dragline bucket without using the grab winch brake.

An additional option is also the so-called "Redundant" control system, which allows restricted operation of the machine in the event of a failure on the electronic base control or its sensors.

On request, Liebherr also offers special custom designed control systems for free fall winches.

The crane is operated with 2 multi-directional joysticks, right for winch I and boom hoist drive, left for winch II and slewing gear. Crawler control is actuated with the two central foot pedals. Additionally, hand levers can be attached to the pedals.

Options:

- Both main winches with double-T levers
- Special demolition control system
- MDE: Machine data recording
- PDE: Process data recording
- GSM – Service Modem
