Technical description

Engine

Power rating according to ISO 9249, 362 hp at 2000 rpm

Engine type ———— Liebherr D 936 L A6

Fuel tank ———— 211 gal capacity with continuous level indicator
and reserve warning

Engine complies with NRMM exhaust certification EPA / CARB Tier 3 and
97/68 EC Stage III

Main winches

Line pull (1st layer) ———— max. 38,600 lbs

Line pull (7th layer) ———— 26,500 lbs

Rope diameter ———— 26 mm

Drum diameter ———— 23 inch

Rope speed ft/min ———— 0 – 446

Rope capacity in 7 layers ———— 1600 ft

The winches are outstanding in their compact design and easy assembly.
Propulsion is via a planetary gearbox in an oil bath.

Load support by the hydraulic system; additional safety factor provided by a
spring loaded, multi-disc holding brake.

The main winches use pressure controlled, variable flow hydraulic motors. This
system features sensors that automatically adjust oil flow to provide max. winch
speed depending on load.

Option – winch with freefall system:

Clutch and braking functions on the freefall system are provided by a compact
designed, low wear and maintenance free multi-disc brake.

Hydraulic system

A double axial displacement pump supplies the open loop hydraulic system,
allowing all functions to be operated simultaneously. To minimize peak pressure
an automatic working pressure cut-off is integrated in the pump. All filters are
electronically monitored.

The use of synthetic environmentally friendly (biodegradable) oils is possible.

Working pressure ———— max. 5076 PSI

Oil tank capacity ———— 172 gal

Crawlers

Propulsion through axial piston motor, hydraulically released spring loaded
multi-disc brake, crawler tracks, hydraulic chain tensioning device.

Flat track shoes ———— 47.2 inch

Drive speed ———— 0 – 1 mph

Luffing jib winch

Line pull ———— max. 23,150 lbs

Rope diameter ———— 20 mm

Jib luffing ———— 51 sec. from 15° to 78°

Boom winch

Line pull ———— max. 47,850 lbs

Rope diameter ———— 24 mm

Boom up ———— 130 sec. from 15° to 86°

Control

The control system – developed and manufactured by Liebherr – is designed
to withstand extreme environmental conditions such as temperature,
vibration and electromagnetic interference and to meet all requirements that
are needed in heavy duty crane operation.

Complete machine operating data are shown on a high resolution display.
Standard operational information is displayed by means of graphical
symbols, fault indications are displayed in plain text (more than 15 languages
available).

The cranes are equipped with proportional control for all main movements,
which can be carried out simultaneously.

The crane is operated with 2 multi-directional joysticks, the right for winch I
and boom, the left for winch II and swing control.

Option:

Bi-directional double T-levers for simultaneous boom and luffing jib
operation.

The crawlers are activated by the two central foot pedals. Additionally, hand
levers can be attached to the pedals.

Swing

Consists of rollerbearing with external teeth, swing drive with fixed axial
piston hydraulic motor, spring loaded and hydraulically released multi-disc
holding brake, planetary gearbox and pinion.

Free swing with hydraulic moment control reduces wear to a minimum.
Alternatively the swing control can be changed to simulate closed loop speed
control. Then a multi-disc holding brake acts automatically at zero swing
motion.

Swing speed from 0 – 3 rpm continuously variable.

Noise emission

Noise emissions correspond with 2000/14/EC directive on noise emission by
equipment used outdoors.
