

features

- 26 Ton (23 mton) Capacity
- 4-Section 101' (30,8 m) Proportional Boom
- 141' 4" (43,1 m) Maximum Tip Height
- 112' 2" (34,2 m) Maximum Main Boom Tip Height
- 1-Section 29' (8,8 m) Jib
- 2-Speed Planetary Hoist with Grooved Drum and Negative Draft Flange
- Load moment system with digital display, CAN bus, overload shutdown, and internal boom length sensing cable
- Radio ATB
- 21' 6" (6,6 m) A-Frame Outriggers
- 10' (3,1 m) A-Frame Stabilizers
- Front bumper stabilizer with auto-retract feature for a 360° area of operation (option).
- Rugged, Weatherproof, Connectorized, Electrical System with Crane System Circuit Status LEDs
- Removable Boom Rest
- System Pressure Gauge
- Clamp-On Mounting
- Manitex UPTIME Comprehensive Support

series 2601

BOOM TRUCKS

product guide

series 2601

GENERAL SPECIFICATIONS

BOOM

Booms - Inverted T-cross section, 4-section telescoping type, extended and retracted proportionally by double-acting hydraulic cylinder and cable-crowd system. Easily replaceable and adjustable high-density nylon slide pads. 4-Section, 29' 5" (9,0 m) to 101' (30,8 m). 1-section, 29' (8,8 m) jib.

Quick Reeve Boom Point - Three high-density nylon load sheaves mounted on heavy-duty roller bearings. Three removable pin-type rope guards.

Boom Elevation - Double-acting hydraulic cylinder. Working range from 10° below horizontal to 80.5° above.

Load Hook - 5-ton (4,5 mton) capacity hook with heavy-duty swivel and weight is provided for single-line operation.

HOIST

Maximum theoretical line speed 300 fpm (91,4 mpm). Maximum theoretical bottom-layer line pull 11,500 lb (5 216 kg). Two-speed planetary reducer. Spring applied, pressure-released internal brake.

WIRE ROPE

300' (91,4 m) of 9/16" (14,3 mm) diameter 6 X 25 EIPS IWRC.

SWING SYSTEM

Oversized diameter ball bearing with external gear, 372° non-continuous rotation is standard. Externally mounted, double-reduction planetary driven by hydraulic motor; spring-applied hydraulically released brake. Maximum swing speed 1.5 rpm

OUTRIGGERS

21' 6" (6,6 m) A-frame link type with double-acting hydraulic cylinders operated independently for precise leveling. Bubble level located near outrigger controls. 16" (406,4 mm) x 20" (508 mm) pivoting pad.

STABILIZERS

A-frame type - 8' (2,4 m) retracted; 10' (3,1 m) extended; mounted under truck frame. Operated independently for precise leveling. 8" (203,2 mm) x 11.38" (288,9 mm) fixed pad.

Out-Down type (option) - 8' (2,4 m) retracted; 13' 11" (4,2 m) extended; mounted under truck frame. Operated independently for precise leveling. 12" (305 mm) diameter pivoting pad.

Front Bumper stabilizer (option) - Single stabilizer mounted at the front of the truck for 360° area of operation. Stabilizer cylinder protected by auto-retract feature to prevent drive away damage. This option may require front frame extensions-consult factory.

MOUNTING

Mounting - Pedestal and subframe are mounted to chassis by threaded rods and clamp plates. No welding, drilling or bolting to truck chassis is required.

Rear Underride Protection - Supplied on factory-mounted cranes. Fabricated structure mounted under rear of carrier. Complies with Bureau of Motor Carrier Safety Standard 393.86.

Subframe - Torsion resistant, rigid 4-plate design, mounted under crane; full length of truck frame.

Boom Rest - Heavy-duty fabrication. Easily removed to simplify loading and unloading truck deck.

CONTROL SYSTEM

Dual operator platforms are equipped with four single-axis lever crane controls arranged to ANSI B30.5 standards, fully proportional control valves and system pressure gauge. Each station also includes outrigger and stabilizer controls, engine start/stop, air foot throttle, signal horn, load moment indicator console, boom-angle indicator, load chart and range diagram and beverage container.

HYDRAULICS

Hydraulic System - A 3-section gear pump direct-mounted to power take-off on truck transmission provides 32 gpm (121 lpm) to the hoist, 10 gpm (38 lpm) to the swing and 21 gpm (79,5 lpm) to the remaining crane functions. 70-gallon (265-liter) baffled reservoir with strainer and 25-micron filter in the return lines. Ball-type shutoff valve and strainer are provided in suction line. All fittings are ORS face and SAE O-ring type.

Hydraulic Cylinders - All load-holding cylinders are equipped with integral holding valves.

WARNING SYSTEMS

Load Moment Indicator (LMI) - CAN bus system maximizes expansion capabilities. Senses boom hoist cylinder pressure, boom length and boom angle. Audio-visual warning indicated overload conditions and overload shutoff feature prevents continuing overload. Operator can access all load conditions via display at the operator station. Internal boom length cable.

Radio Anti-Two-Block System - Audible warning and shutoff functions prevent hook from contacting boom point. Wireless system eliminates downtime typically associated with damaged cables in wired systems.

Back-Up Alarm - Electronic audible motion alarm activates when truck transmission is in reverse gear.

GENERAL

Electrical - State-of-the-art, designed with weather-resistant components throughout. Hermetically sealed power in relays. Enclosure includes power in relays and circuit status LEDs. Designed to withstand high-pressure washing and varying climates.

Design/Welding - Design conforms to ANSI B30.5. Welding conforms to AWS D1.1. Tested to SAE 1063 and SAE 765.

Manuals - Operator, service and parts manuals depict correct crane operation, maintenance procedures and parts listing.

Warranty - 12-month warranty covers parts and labor resulting from defects in material and workmanship.

* In order to ensure continuous improvement, specifications may change without notice.

UPTime is the Manitex commitment to complete support of thousands of units working every day.

UPTime

- Includes 24-7-365 parts shipments.
- Utilizes the efficiency of UPNet online parts order system.
- Relies on Manitex's UPTrak support tracking system for performance analysis and resource allocation.
- Features REMan, Manitex's cost effective rebuild/exchange program.
- Provides expert service technicians for troubleshooting and site visits.
- Mandates training; at our facility and yours. It includes coordinated support from all component suppliers.
- Involves every Manitex team member in the support of every Manitex customer.

What does UPTime mean to Manitex customers?

UPTime means reliability.

UPTime means utilization.

UPTime means profitability.
