Why Buy a National Crane Series 800D?

2

*Product may be shown with optional equipment.

- 23 USt (20.87 t) maximum capacity
- 152 ft (46.32 m) maximum vertical reach*
- 109 ft (33.22 m) maximum vertical hydraulic reach*
- Load Moment Indicator System (LMI) or Hydraulic Capacity Alert System (HCA)
- Proportional boom extension
- High performance planetary winch
- Heavy-duty triple pump hydraulics

* Maximum vertical reach is ground-level to boom tip height at maximum extension and angle with outriggers/stabilizers fully extended.

- **23 USt (20.87 t) Rating** – The 800D is a 23 USt (20.87 t) machine.
- **100 ft (30.48 m) Four-section Boom** – The longest in its size range. The longer boom allows the operator to perform more lifts without the use of a jib, reducing setup time and improving efficiency.
- **Overload Protection** – All National cranes are equipped with overload protection:
 - Load Moment Indicator (LMI) required on all machines equipped with jibs or personnel baskets.
 - LMI or Hydraulic Capacity Alert System (HCA) required with ordering machine without jib or personnel basket.
- **Internal Anti-two-block Wire** – The patent-pending design, standard on the 800D, routes the wire through the inside of the boom. No more snagging the wire on obstructions.
- **Easy Glide Wear Pads** – Reduce the conditions that cause boom chatter and vibration. The net result is smoother crane operation.
- **Adjustable Swing Speed** – Standard on the 800D. A control knob located on the swing motor brake release valve can be easily adjusted to the crane operator's swing speed preference.
- **Electronic versions of manuals available through Manitowoc Crane CARE.**
- **Heavier Duty Torsion Box** – The stronger standard torsion box improves rigidity, reduces truck frame flex and reduces the need for counterweight.
- **Speedy-Reeve Boom Tip and Sheave Blocks** – These standard features simplify rigging changes. Load line wedge socket removal not required for reeving of multi-part line options.
- **Pre-painted Components** – Painting crane components before assembly reduces the possibility of rust, improves serviceability and enhances the appearance of the machine.
- **Improved Serviceability and Reliability** –
 - Sheave bearings on the boom extend and retract cables can be greased through access holes in the boom side plates.
 - The number of internal boom parts has been reduced, facilitating rebuilding the machine.
- **New State-of-the-Art Control Valve** – Provides smoother operation. The new design eliminates parts, reducing repair costs and improving the machine's serviceability.
- **National Crane Is the Market Leader** – National Crane is number one in the production of commercial truck-mounted boom trucks. National Crane has the resources, programs and people to provide our customers with reliable products.
- **National Crane has the boom truck industry's leading test program** – Structural parts of the crane have been cycle tested up to 60,000 cycles at full capacity. In addition to cycle testing, each model has been subjected to intensive strain gauge testing that measures metal deformation as small as one one-millionth of an inch. The net result is that any weak areas are caught in test, not on job sites where costly downtime occurs.
- Parts are available for all National Crane machines for the life of the crane.
- National Crane has a formalized quality program and is ISO 9001 certified.

800D

mounting configurations

The configurations are based on the Series 800D with an 85% stability factor. The complete unit must be installed in accordance with factory requirements and a test performed to determine actual stability and counterweight requirements since individual truck chassis vary. Trucks with a frame height in excess of 42 inches (107 cm) after mounting will have a final mounted unit height more than 13' 6" (411.5 cm). Chassis that do not meet these minimum stability weights may require counterweight.

Configuration 1 – 8100D

Working area	180°
Gross Axle Weight Rating Front	16,000 lb (7257 kg)
Gross Axle Weight Rating Rear	34,000 lb (15 422 kg)
Gross Vehicle Weight Rating	50,000 lb (22 679 kg)
Wheelbase	256 in (650 cm)
Cab to Axle/trunnion (CA/CT)	192 in (488 cm)
Frame Section Modulus (SM) under crane: 110,000 PSI (758 MPa)	15.9 in ³ (260.6 cm ³)
Frame Section Modulus (SM) over rear stabilizers: 110,000 PSI (758 MPa)	13.0 in ³ (213.0 cm ³)
Stability Weight, Front	8,500 lb (3856 kg) minimum*
Stability Weight, Rear	9,100 lb (4128 kg) minimum*
Estimated Average Final Weight	40,800 lb (18 507 kg)

This configuration allows the installation of the Series 8100D on a chassis by using the subbase for a 22-ft. (6.71-m) bed.

Configuration 2 – 8100D (add SFO for 360° stability)

Working area	360°
Gross Axle Weight Rating Front	16,000 lb (7257 kg)
Gross Axle Weight Rating Rear	34,000 lb (15 422 kg)
Gross Vehicle Weight Rating	50,000 lb (22 679 kg)
Wheelbase	256 in (650 cm)
Cab to Axle/trunnion (CA/CT)	192 in (488 cm)
Frame Section Modulus (SM) under crane: 110,000 PSI (758 MPa)	20.0 in ³ (327.7 cm ³)
Frame Section Modulus (SM) over rear stabilizers: 110,000 PSI (758 MPa)	13.0 in ³ (213.0 cm ³)
Stability Weight, Front	8,500 lb (3856 kg) minimum*
Stability Weight, Rear	9,100 lb (4128 kg) minimum*
Estimated Average Final Weight	41,200 lb (18 688 kg)

This mount requires front stabilizer for full capacity 360° around the truck. Front stabilizer gives the machine a solid base. This configuration requires a 22-ft (6.71-m) bed for rear overhang, and extended front frame rails for SFO mounting. NOTE: Chassis will require extended front frame rails for SFO mounting.

Configuration 3 – All boom lengths, other than 8100D

Working area	180°
Gross Axle Weight Rating Front	16,000 lb (7257 kg)
Gross Axle Weight Rating Rear	34,000 lb (15 422 kg)
Gross Vehicle Weight Rating	50,000 lb (22 679 kg)
Wheelbase	234 in (594 cm)
Cab to Axle/trunnion (CA/CT)	165 in (419 cm)
Frame Section Modulus (SM) under crane w/110,000 PSI (758 MPa)	15.9 in ³ (260.6 cm ³)
Frame Section Modulus (SM) over rear stabilizers: 110,000 PSI (758 MPa)	13.0 in ³ (213.0 cm ³)
Stability Weight, Front	7,500 lb (3402 kg) minimum*
Stability Weight, Rear	9,100 lb (4128 kg) minimum*
Estimated Average Final Weight (890D)	38,800 lb (17 600 kg)**

This configuration allows the installation of the Series 800D on a chassis with a subbase and bed combination which best fits the boom length. Depending on the boom length, the bed can be 18', 20' or 22'. Not all bed lengths can be used with each boom due to rear overhang limits.

Configuration 4 – All boom lengths, other than 8100D

Working area	360°
Gross Axle Weight Rating Front	16,000 lb (7257 kg)
Gross Axle Weight Rating Rear	34,000 lb (15 422 kg)
Gross Vehicle Weight Rating	50,000 lb (22 679 kg)
Wheelbase	234 in (594 cm)
Cab to Axle/trunnion (CA/CT)	165 in (419 cm)
Frame Section Modulus (SM) under crane w/110,000 PSI (758 MPa)	20 in ³ (327.7 cm ³)
Frame Section Modulus (SM) over rear stabilizers: 110,000 PSI (758 MPa)	13 in ³ (213.0 cm ³)
Stability Weight, Front	7,500 lb (3856 kg) minimum*
Stability Weight, Rear	9,100 lb (4128 kg) minimum*
Estimated Average Final Weight (890D)	39,200 lb (17 780 kg)

This mount requires front stabilizer for full capacity 360° around the truck. Front stabilizer gives the machine a solid base. Bed length and subbase combinations must match boom length to limit rear overhang. Extended front frame rails required for SFO mounting. NOTE: Chassis will require extended front frame rails for SFO mounting.

Configuration 5 – Rear Mount (all boom lengths)

Working area	360°
Gross Axle Weight Rating Front	16,000 lb (7257 kg)
Gross Axle Weight Rating Rear	40,000 lb (18 143 kg)
Gross Vehicle Weight Rating	56,000 lb (25 401 kg)
Wheelbase	244 in (620 cm)
Cab to Axle/trunnion (CA/CT)	170 in (432 cm)
Frame Section Modulus (SM) under crane: 110,000 PSI (758 MPa)	15.9 in ³ (260 cm ³)
Stability Weight, Front	8,500 lb (3855 kg) minimum*
Stability Weight, Rear	8,800 lb (3991 kg) minimum*
Estimated Average Final Weight (8100D)	43,000 lb (19 504 kg)

This configuration allows the rear-mount installation of the Series 800D. This configuration is 360° stable and allows the effective use of close working area to lift the heavier capacity loads. Maximum bed length is 16' (4.87 m). Requires single rear outrigger.

Notes:

- Gross Vehicle Weight rating (GVWR) is dependent on all components of the vehicle (axles, tires, springs, frame, etc.) meeting manufacturers' recommendations; always specify GVWR when purchasing trucks
- Diesel engines require a variable speed governor and energize-to-run fuel solenoid for smooth crane operation; electronic fuel injection requires EET engine remote throttle

- All mounting data is based on a National Series 800D with an 85 percent stability factor
- The complete unit must be installed in accordance with factory requirements, and a test performed to determine actual stability and counterweight requirements per SAE J765; contact the factory for details
- Transmission neutral safety interlock switch is required with optional remote control

*Estimated axle scale weights prior to installation of crane, stabilizers and subbase for 85% stability.

**If the distance from the front bumper (SFO) to center of rotation exceeds 144 inches (366 cm), the 40-ft (12.19 m) overall truck length restriction will be exceeded. Overall length restrictions vary from state to state. In some states it is legal to be more than 40 ft (12.18 m) in length, and some states allow overlength permits.

3

800D

specifications

Boom and Jib Combinations Data

Available in five basic models.

4

Model 851D – Equipped with a 21 ft. to 51 ft. (6.4-15.5 m) three-section boom. Maximum tip height is 62 ft. (18.9 m).

Model 860D – Equipped with a 24 ft. to 60 ft. (7.31-18.28 m) three-section boom. Maximum tip height is 71 ft. (21.64 m).

Model 880D – Equipped with a 24 ft. 6 in. to 80 ft. (7.46-24.38 m) four-section boom. This model can be equipped with a 22-39 ft. (6.70-11.88 m) two-section jib. Maximum tip height w/39 ft. (11.88 m) jib is 128 ft. (39.01 m).

24'6"-80' (7.46-24.38 m) four-section boom.

24'6"-80' (7.46-24.38 m) four-section boom. **8FJ39M** 22-39 ft. (6.70-11.88 m) two-section jib

Model 890D – Equipped with a 27 ft. to 90 ft. (8.23-27.43 m) four-section boom. This model can be equipped with a 25-44 ft. (7.62-13.41 m) two-section jib. Maximum tip height w/44 ft. (13.41 m) jib is 143 ft. (43.58 m).

27'-90' (8.23-27.43 m) four-section boom.

27'-90' (8.23-27.43 m) four-section boom. **8FJ44M** 25-44 ft. (7.62-13.41 m) two-section jib

Model 8100D – Equipped with a 29 ft. 6 in. to 100 ft. (8.99-30.48 m) four-section boom. This model can be equipped with a 25-44 ft. (7.62-13.41 m) two-section jib. Maximum tip height w/44 ft. (13.41 m) jib is 152 ft. (46.32 m).

29'6" - 100' (8.99-30.48 m) four-section boom.

29'6" - 100' (8.99-30.48 m) four-section boom. **8FJ44M** 25-44 ft. (7.62-13.41 m) two-section jib

Note: Maximum tip is measured with outriggers/stabilizers fully extended.

800D Winch Data

800D Winch Data

- All winch pulls and speeds in this chart are shown on the **fourth** layer
- Winch line pulls would increase on the first, second and third layers
- Winch line speed would decrease on the first, second and third layers
- Winch line pulls may be limited by the winch capacity or the ANSI 5 to 1 cable safety factor
- Hook blocks are rated at maximum capacity for the block. **Do not exceed rated cable pull with any block.**

			1 Part Line	2 Part Line	3 Part Line	4 Part Line	5 Part Line	6 Part Line
Winch	Cable Supplied	Average Breaking Strength	Lift and Speed	Lift and Speed	Lift and Speed	Lift and Speed	Lift and Speed	Lift and Speed
Standard Planetary Winch	9/16" Diameter Rotation Resistant	38,600 lb (17,463 kg)	7,700 lb (3,492 kg) 147 fpm (45 m/min)	15,400 lb (6,985 kg) 73 fpm (22 m/min)	23,100 lb (10,477 kg) 49 fpm (15 m/min)	30,800 lb (13,970 kg) 38 fpm (11 m/min)	38,500 lb (17,163 kg) 29 fpm (9 m/min)	46,000 lb (20,865 kg) 25 fpm (8 m/min)
With "Burst-of-Speed"	Same as corresponding cable data shown above		3,000 lb (1,360 kg) 206 fpm (62 m/min)	6,000 lb (2,721 kg) 103 fpm (31 m/min)	9,000 lb (4,082 kg) 68 fpm (20 m/min)	12,000 lb (5,443 kg) 51 fpm (15 m/min)	15,000 lb (6,803 kg) 41 fpm (12 m/min)	18,000 lb (8,164 kg) 34 fpm (10 m/min)

Winch	Bare Drum Pull	Allowable Cable Pull
With standard rotation resistant rope	10,200 lb (4,627 kg)	7,700 lb (3,493 kg)

Block Type	Rating	Weight
Downhaul Weight	3.85 USt (3.49 t)	150 lb (68 kg)
1 Sheave Block	11.55 USt (10.48 t)	305 lb (138 kg)
2 Sheave Block	19.25 USt (17.46 t)	355 lb (161 kg)
3 Sheave Block	30.00 USt (27.21 t)	575 lb (261 kg)

800D

capacities

Load Rating Chart: Series 8100D (30.48 m) Boom with 44 ft (13.41 m) Jib

CAUTION:

- Do not operate crane booms, jib extensions, any accessories or loads within 10 ft (3m) of live power lines or other conductors of electricity.
- Jib and boom capacities shown are maximum for each section.
- Do not exceed capacities at reduced radii
- Load ratings shown on the load rating charts are maximum allowable loads with the outriggers properly extended on a firm, level surface and the crane leveled and mounted on a factory recommended truck.
- Always level the crane with the level indicator located on the crane.
- The operator must reduce load to allow for factors such as wind, ground conditions, operating speeds and their effects on freely suspended loads.
- Overloading this crane may cause structural collapse or instability.
- Weights on any accessories attached to the boom or loadline must be deducted from the load chart capacities.
- Do not exceed jib capabilities at any reduced boom lengths.
- Do not deadhead lineblock against boom tip when extending boom or winching up.
- Keep at least three wraps of loadline on drum at all times.
- Use only specified cable with this machine.

5

SERIES 8100D (30.48 M) WITH 44 ft (13.41 M) JIB

NOTE:

- Operate with jib by radius when main boom is fully extended. If necessary increase boom angle to maintain loaded radius.
- Operate with jib by boom angle when main boom is not fully extended. Do not exceed rated jib capacities at any reduced boom lengths.

capacities

Load Rating Chart: Series 860D (18.28 m) Boom with No Jib

8

CAUTION:

- Do not operate crane booms, jib extensions, any accessories or loads within 10 ft (3m) of live power lines or other conductors of electricity.
- Jib and boom capacities shown are maximum for each section.
- Do not exceed capacities at reduced radii
- Load ratings shown on the load rating charts are maximum allowable loads with the outriggers properly extended on a firm, level surface and the crane leveled and mounted on a factory recommended truck.
- Always level the crane with the level indicator located on the crane.
- The operator must reduce load to allow for factors such as wind, ground conditions, operating speeds and their effects on freely suspended loads.
- Overloading this crane may cause structural collapse or instability.
- Weights on any accessories attached to the boom or loadline must be deducted from the load chart capacities.
- Do not exceed jib capabilities at any reduced boom lengths.
- Do not deadhead lineblock against boom tip when extending boom or winching up.
- Keep at least three wraps of loadline on drum at all times.
- Use only specified cable with this machine.

accessories

13

Radio Remote Controls –

Eliminate the handling and maintenance concerns that accompany cabled remotes. Operate to a range of about 250 feet (76 m), varying with conditions.

• **NB4R**

One-Person Basket –

Strong but lightweight steel basket with 300 lb (139 kg) capacity, gravity hung with swing lock and full body harness.

• **B1-S**
• **2B1-S** (for dual locking baskets)

Heavy-duty Personnel Basket –

1,200 lb. (544 kg) capacity steel basket with safety loops for four passengers. Gravity leveling 72 x 42 in (183 x 107 cm) platform. Fast attachment and secure locking systems. Load chart must show 2,300 lb (1043 kg) minimum to operate this accessory.

• **BSA-1**
• **BSA-R1** (provides rotation)

Hydraulic Oil Cooler –

Automatic, self-contained radiator system with electric fans cools oil under continuous operation.

• **OC**

Continuous Rotation –

Allows rotation of turret/boom without rotation stop.

• **CR**

Single Front Outrigger –

Center mount front stabilizer with 25 in vertical stroke.

• **SFO**

Hour Meter –

Hour meter in truck cab to record crane operation hours.

• **HRM**

Bulkhead Options –

Steel 30 in solid wall bulkhead.

• **BHSI**
• **BHSD**

Steel Tool Box Options –

Spanish-Language Danger Decals, Control Knobs, and Operators' Manuals –

• **SDD**
• **SOM**
