

P&H

320

Crawler Excavator

P&H

Exclusive P & H live roller circle assures even weight distribution of upper and load.

Tractor-type long crawlers with exchangeable shoes and life-time lubricated rollers.

Crawler Excavator 320

The upper frame with P & H power box is of rugged all-welded construction. The power box contains all the gears and shafts necessary to transmit power to all machine motions. All gearing is completely encased and splash lubricated. Built for high performance in heavy duty operation the compact power box design provides for easy accessibility to clutches and brakes for adjustments.

Positive hydraulic control, grooved drums and shafts running on anti-friction bearings, "triple-safe" independent planetary boom hoist, exclusive P & H live roller circle, direct power transmission from engine to power box, 4-speed transmission and full-view operators cab are standard features.

Dragline Specifications

Working ranges in meters (m)

Clamshell ratings shown also apply to magnet, grapple and all other material handling buckets except dragline which is rated separately. For clamshell and magnet operations, the weight of bucket or magnet is considered a part of the load and the total weight of bucket plus contents or magnet plus load must not exceed the corresponding ratings shown. Max. allowable size of bucket is 0,8 cbm.

Crane Working Ranges

Crawler Excavator 320

Maximum jib ratings in kg

Offset Angle Jib to Boom Under Full Load	Jib Length in meter		
	4,57	6,10	7,62
10°	4540	3630	2950
20°	3630	2950	2490
30° max.	3170	2270	2040

Jib ratings at any radius from center of rotation are the same as crane ratings shown in table for main boom when operated at that radius, but do not exceed maximum jib ratings shown. For bucket ratings on jib, deduct 10 % from jib ratings. Maximum jib operating radius not to exceed length of main boom on which it is being used.

Weight of lifting tackle- kg

Weight of single or two sheave	
Hook block	approx. 170 kg
Jib hook	approx. 100 kg

slings and handling accessories vary by size and make

Backstops recommended for all boom lengths. At raddii and boom lengths where no ratings are shown on plate, operation is not intended or approved. Ratings are based upon freely suspended loads and machine standing on firm level, uniformly supporting surface. Safe loads depend upon conditions, boom length, radius of operation, and proper handling, all of which must be taken into account by the user. Ratings are contingent upon machine being equipped with proper boom.

Hoist line reeving

No. of Parts of Line	1	2	3	4

------------	--

Line Pull (max.)	2nd gear 7000 kg 3rd gear 5700 kg
------------------	--------------------------------------

Working Weight	23000 kg
----------------	----------

Operating radius is horizontal distance from the centerline of rotation to a vertical line through the gravity center of the load. Capacities shown are for units with 4080 kgs steel punchings and 1360 kgs cast counterweight, and do not exceed 75 % of tipping loads. The crane ratings include weight of hook, block, slings and all other load handling accessories. Deduct 450 kgs from main hook rating when boom is equipped with jib.

P&H

General Specifications

General dimensions

A –	Width of upper structure	2,59 m
B –	Height to top of cab	3,30 m
C –	Radius of rear end	3,31 m
D –	Center of rotation to boom foot pin	1,07 m
E –	Height from ground to boom foot pin	1,47 m
F –	Clearance height over gantry	3,41 m
G –	Counterweight ground clearance	0,97 m
L –	Overall Length of machine	5,44 m
S –	Overall length of crawlers Center to center of sprockets	4,19 m 3,33 m
T –	Overall width of crawlers with 710 mm s.g. shoes	3,25 m
Y –	Ground clearance of carbody (lowest point)	0,37 m
Total Weight – Basic Machine		22000 kg

Lower machinery

Control: Direct acting hydraulic, lever actuated.

Propel brakes: Spring loaded double acting propel and steering brakes release automatically under engine power when travelling, set automatically when propelling power not applied.

Tractor type crawlers, standard: Automatic spring-loaded track tension.

Crawler shoes: bolted, individually replaceable.

Total number both sides: 98

Shoe width (standard) 710 mm semi-grouser

Shoe width (optional) 810 mm semi-grouser

Track rollers: Ten in each frame, lifetime lubricated

Swing rollers: 28 rollers in live roller circle

Swing gear: Internal cut teeth

Swing clutches: Two shoe type, internal-expanding

Upper machinery

Power plant: Deutz F6L 912, 6 cyl., aircooled, 90 HP/ 2000 RPM std., DAF DD 575 A, 4 cyl., optional

Fuel tank: approx. 150 lt.

Transmission: 4-speed, second gear normal operating speed

Controls: Direct acting hydraulic

Boom hoist assembly: Independent planetary gear type, with external ratchet and automatic brake provides for raising and lowering boom under power and locking boom. Drum mounted on anti-friction bearings.

Hoist + digging drums: Mounted on anti-friction bearings.

Clutches – main drums: Band type, internal expanding.

Brakes – main drums: Band type, external contracting.

Type of fastening to lower: 5 adjustable hook rollers. Two double rear, one front.

Counterweight: Internal non-removable punchings in counterweight box at rear of machine and external single piece removable casting.

Speeds (with Deutz F6L 912 Diesel engine)

	Single Line Speed	Swing Speed	Propel Speed
1st gear	26 m/min	2,1 U/min	0,92 km/h
2nd gear	49 m/min	3,9 U/min	1,75 km/h
3rd gear	60 m/min	4,8 U/min	2,15 km/h
4th gear	–	–	4,15 km/h
