PALFINGER CRANE

THE IDEAL CRANE FOR MUNICIPAL DUTY

A MIGHTY PARTNER

The PK 10501 *Performance* handles even the most difficult jobs reliably and efficiently. Amongst other things, it is supported by the High Power Lifting System (HPLS) which if required reduces the working speed and significantly increases the lifting capacity of the crane.

This PALFINGER product proves its strength both in the transport sector as well as in municipal duty. Various attachments widen the range of applications considerably and make the PK 10501 *Performance* a working unit for universal deployment.

IDEAL FOR MULTI-TASK DUTY

Return Oil Utilization

The high speed of the boom extension system is impressive. It results from the return oil utilization feature, which is installed as standard, and the generously dimensioned hydraulic pipes. This increases the operating speed by 30 per cent.

Load-holding valves

They prevent the crane booms from dropping and are fitted as standard on the main boom cylinder, the extension boom cylinders, and the swivel cylinder. The valves are positioned in such a way that they are protected from being damaged.

Central lubrication

For all bearings on the base frame.

Advanced Package

- Radio remote control
- PALTRONIC 50
- Oil cooler
- External 100 l additional tank
- HPLS

CONVINCES WITH GREAT LIFTING CAPACITY

Hose equipment for accessories

This option provides the oil supply for accessories. The hoses are routed in compact hose trays and are therefore well protected.

Internally routed oil ducts

The internally routed oil passages make it possible to have a compact boom design for the boom extension system and ensure perfect protection from damage.

Extension Boom System

- The extension boom cylinders are guided on Jordal rails over guide blocks.
- Optimal height compensation of the extension cylinders.

Large outrigger widths

The PK 10501 *Performance* can be fitted on all standard truck chassis. Three outrigger widths are possible: 3.3 m (10' 8") mechanical, 4.9 m (16' 1") mechanical or hydraulically, and 5.6 m (18' 4") hydraulically.
