PK 15002

Performance

PALFINGER

FLEXIBILITY AND EFFICIENCY
ARE ITS STRENGTHS

IT PROVES ITS RELIABILITY IN CONTINUOUS SERVICE ON THE CONSTRUCTION SITE

Whether in the municipal sector, handling building materials or on the construction site, the PK 15002 *Performance* is your reliable partner. Easy maintenance, quality and reliability are the result of decades of research and development. PALFINGER proves this with the thoughtfully designed technical details such as the proven Power Link System, the new Functional Design Package and other technical highlights.

THE PK 15002 *PERFORMANCE* UNDERLINES THE INNOVATIVE PROWESS OF PALFINGER

Return oil use

By using of the return oil flow in the extension system, the operating speed is increased by 30 per cent.

Hose equipment for accessories

With this option you can provide the oil supply to accessories. The hoses are routed in compact troughs and plastic link chains. They are thus optimally protected.

Internally routed oil ducts

On the multiple extensions there are no hydraulic hoses between the cylinders. The internally routed oil passages make it possible to have a compact boom design.

Extension system

The extension cylinders are guided in Jordal rails over rollers.

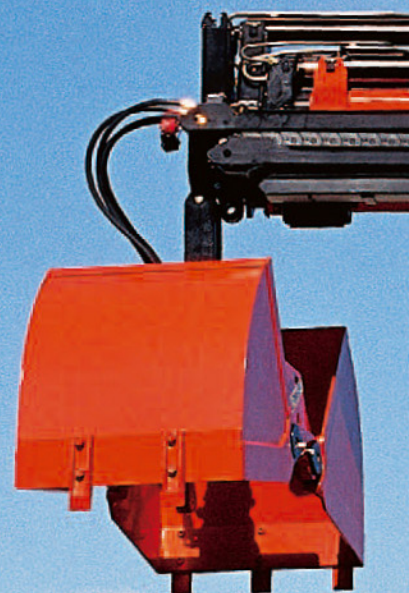

Height compensation

Optional

- The PALFINGER radio control system with digital data transmission
- The PALTRONIC 50 electronic control system
- The hydraulic overload safety device
- Hose equipment for accessories

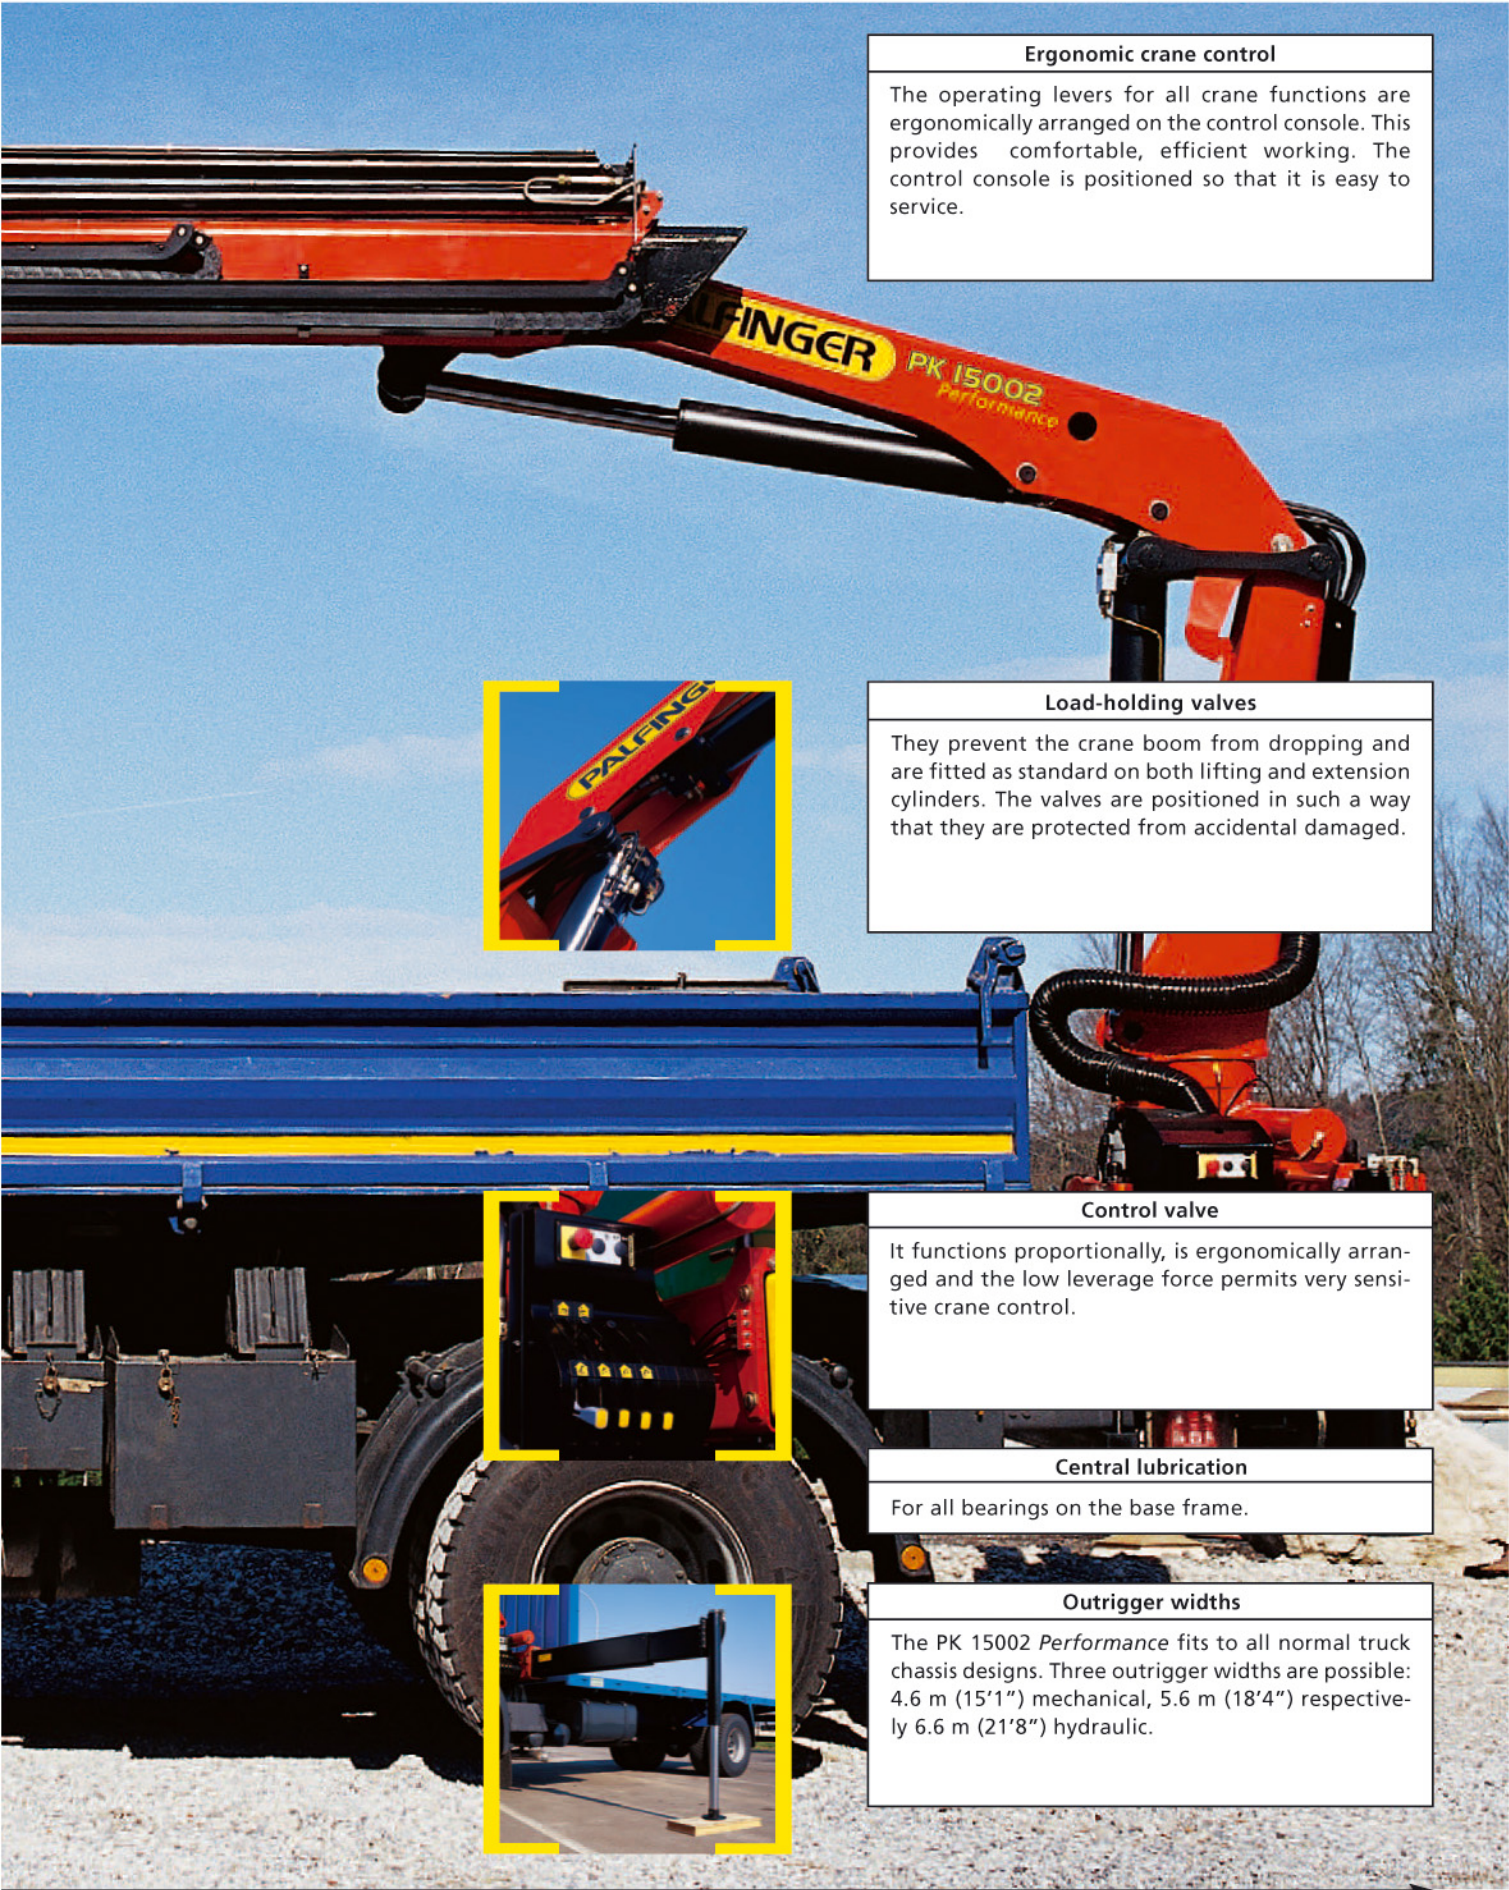

Functional Design

- Enclosure in the area of the control valve
- Enclosure of the hoses behind the crane column
- Spiral tube hose between base frame and crane column

**WELL SUPPORTED BY MORE THAN 1400 PALFINGER
CONTRACT PARTNERS WORLDWIDE**

Ergonomic crane control

The operating levers for all crane functions are ergonomically arranged on the control console. This provides comfortable, efficient working. The control console is positioned so that it is easy to service.

Load-holding valves

They prevent the crane boom from dropping and are fitted as standard on both lifting and extension cylinders. The valves are positioned in such a way that they are protected from accidental damaged.

Control valve

It functions proportionally, is ergonomically arranged and the low leverage force permits very sensitive crane control.

Central lubrication

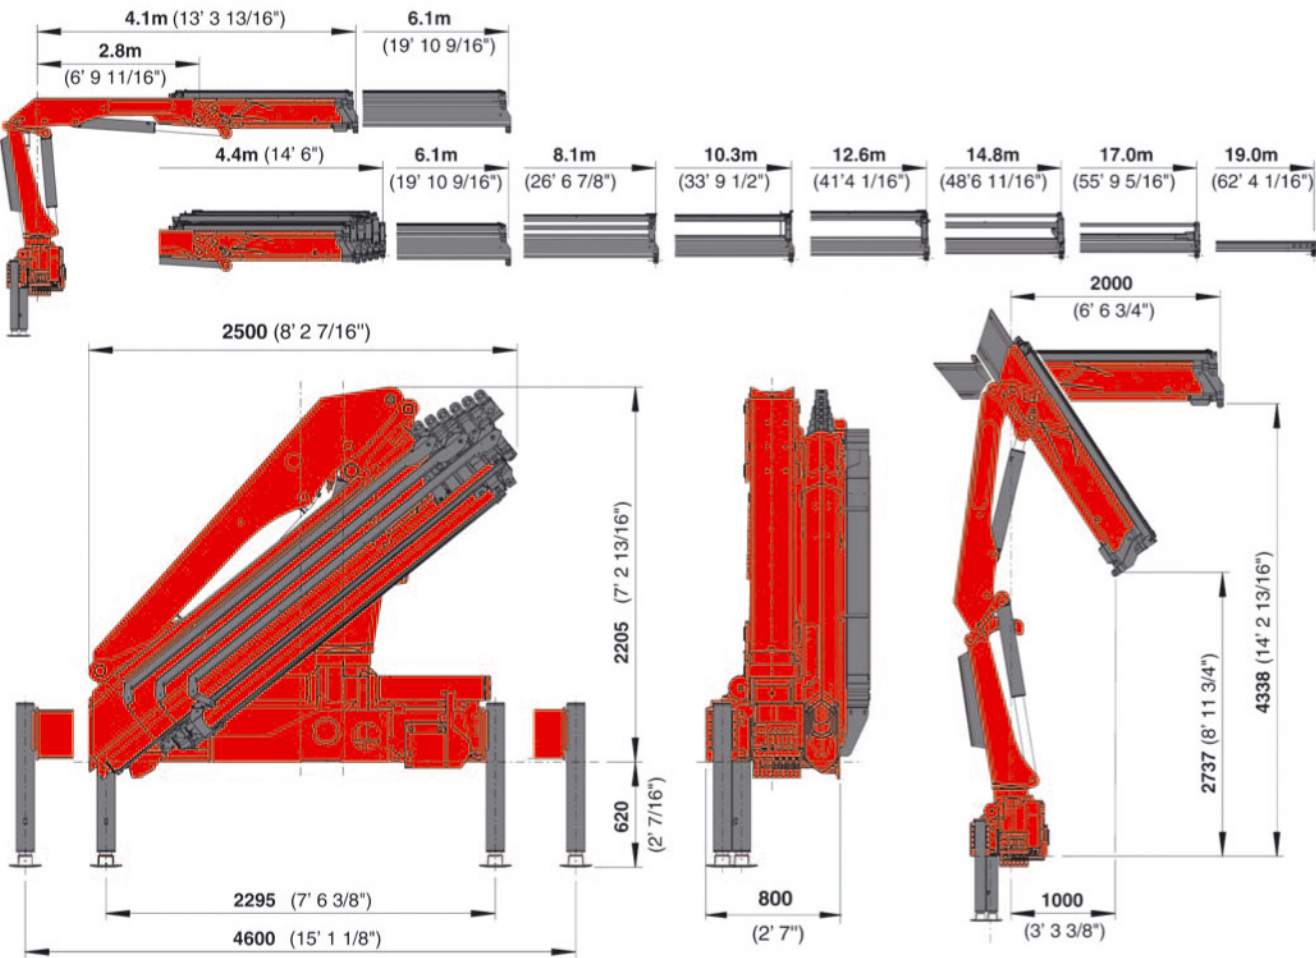

For all bearings on the base frame.

Outrigger widths

The PK 15002 *Performance* fits to all normal truck chassis designs. Three outrigger widths are possible: 4.6 m (15'1") mechanical, 5.6 m (18'4") respectively 6.6 m (21'8") hydraulic.

A REAL PALFINGER, INCORPORATING DECADES OF PRACTICAL EXPERIENCE!

PK 15002 Performance			
Technical specifications (DIN 15018 H1-B3)			
Max. lifting moment	13.9 mt/136.4 kNm	100570 ft.lbs	
Max. lifting capacity	6200 kg/60.8 kN	13670 lbs	
Max. hydraulic outreach	17.0 m	55' 9"	
Maximum outreach	0.0 m	0' 0"	
Slewing angle	420°		

PK 15002 Performance			
Standard crane			
Slewing torque	1.8 mt/17.7 kNm	13050 ft.lbs	
Stabilizer spread standard	4.6 m	15' 1"	
Stabilizer spread maximum	6.6 m	21' 8"	
Fitting space required	0.80 m	2' 7"	
Width folded	2.5 m	8' 2"	
Operating pressure	300 bar	4350 psi	
Recommended pump capacity	from 40 l/min.	8.8 imp.gal./min.	10.6 US gal./min
by radio remote control and LS-System	to 60 l/min.	13.2 imp.gal./min.	15.9 US gal./min
Dead weight (without mounting parts, pump and oil)	1647 kg	3630 lbs	

Executions shown in the leaflet are not always corresponding to standard execution.
Country-specific regulations are to be observed upon attachment.

THE PK 15002 PERFORMANCE ALREADY MEETS THE REQUIREMENTS OF THE FUTURE EN 12999 CRANE STANDARD
