

SC-100

LATTICE BOOM CRAWLER CRANE

SC-100

TECHNICAL DESCRIPTION

A new model

Crawler mounted crane designed to meet features and standards of lifting units adding characteristics of the cranes for foundations jobs. Easy transport fitting.

Main features

- Multi element lattice boom
- Boom hoist by a multiple reeving winch
- Engine DEUTZ TCD 2015
- Controlled descent or free fall type winches
- Comfortable operator cab
- Mechanical and hydraulic fittings for casing oscillator
- Tracks removable variable gauge
- Self assembling tracks
- Self-lifting counterweight
- Wide range of optionals

Notes

- The rated loads are based on machine at firm level ground and without travelling.
- The rated loads are in metric tons valid for 360° degree swing.
- The rated loads are calculated to comply DIN 15018, DIN 15019 and do not exceed 75% of tipping load.
- The rated loads include the weight of all lifting attachments.
- The users derate or limit the lifted loads to allow for adverse conditions such as: soft or uneven ground, out of level, wind, side loads, pendulum action, jerking or sudden stopping of load, inexperience of personnel, and possible travelling with a load.
- The max line pull for crane operation is only approximate. It must be referred to used rope with end terminations, in accordance to CEE directive.
- Lifting chart values must be applied in complete optimum boom assembly and head with plastic sheaves.
