Notes:

- Capacities shown are in metric tons and are based on 78% of minimum tipping loads –over the side– with machine standing level on firm supporting surface under ideal job conditions unless marked with an asterisk (※) that indicates capacities are based on factors other than those which would cause a tipping condition. Deductions from the lifting crane capacities must be made for weight of hook block, or other suspended gear.

Kind of hook block	70 t	20 t	6.5 t
Weight of hook block (t)	0.85	0.4	0.33

- Side frame must be extended for all operating conditions.
- When handling loads by main hoist line on boom with jib fitted, the following deductions must be made from above crane capacities.

Jib length (m)	9.15	13.70	18.30	Aux. short jib
Weight to be deducted (t)	1.5	2.1	2.8	0.3
