

COMMAND PERFORMANCE

**NEW
CARRIER CAB**

Mobility matters

Comfortable, ergonomic design is no luxury – it pays. After all, what's the point of a mobile crane if it doesn't move? And relocating it from one jobsite to the next and then maneuvering it into position safely takes concentration and skill. That's why, when developing the specifications for these new cabs, Terex relied on extensive input from a series of focus groups that included customers and their drivers and operators. Terex also consulted with world-class ergonomics experts from the automotive industry.

Features for safety and ergonomics

- ▶ For increased safety enhanced lighting systems: daytime running lamps, fog lamps incl. curve lights, integrated rotary beacon
- ▶ Electrically adjustable and heated mirrors
- ▶ B-pillars removed for better view of mirrors
- ▶ Ergonomic seat design: Automatic height adjustment, pneumatic suspension, seat cushion depth adjustment, integrated headrest, shoulder adjustment, pneumatic lumbar support, integrated seat belt design (prevents belt from rubbing against the body), seat heating and armrest for driver
- ▶ Height and tilt-adjustable steering wheel
- ▶ 3 x 24V electrical outlets in the rear, 1 x 12V under the dashboard

COMFORTABLY IN CONTROL

**NEUE
CRANE CAB**

EVERYTHING UNDER CONTROL

The intuitive control system eliminates distractions and lets crane operators concentrate on their work.

Ergonomic environment

A crane operator's job is often already stressful enough. Highly skilled operators need a comfortable, intuitive, convenient workplace – one that ensures efficiency and safety for everyone at the jobsite. In this crane cab they'll find exactly what they're looking for, because we listened to them when we designed it. Everything here is within easy reach. The equipment layout combines optimal visibility, ergonomics and touchscreen functionality.

High visibility

Crane operators need to be in complete control over lifting operations at all times. And they have to be able to maneuver easily even under difficult conditions and in confined spaces. That's why the new Terex crane cab has been designed for maximum visibility – because crane operators can't work safely unless they can see what they're doing.

Features for safety and ergonomics

- ▶ Infinitely variable tilt up to 20°
- ▶ Safety standards: Crane standard EN 13849, roof wiper, laminated roof safety glass, tinted safety glass, handrails
- ▶ Sliding side pedestal and foldable front pedestal providing safe access
- ▶ Engine-dependent and independent heating with timer
- ▶ "Position out of Window" (POW) wiper system for maximum visibility
- ▶ Adjustable graphic user interface IC-1
- ▶ Sliding window in door and rear; fold-out front window
